Aaron -

I hope you are feeling better.

As I said on the phone, this is a change of use permit because the use in some of the area is changing.

I need to know if there will just be storage of trucks and other vehicles and equipment or if there will also be repair work going on in the rear of the building. I can't sign off for zoning until I know what the exact use is going to be.

Thanks.

Ann

Ann - There is NO vehicle maintenance in the spaces that you were asking about. That use will be a future phase in a new section of building that is not currently proposed. This space will only be used as vehicle storage as of now.
