

Exhibit 9: Construction Management Plan

The proposed project involves the construction of a new building addition at an existing, public works facility located at 250 Canco Road. The City of Portland Department of Public Buildings will manage the construction of the project. The City anticipates soliciting public bids for the building. Once a building contractor is selected, the City will initiate construction. The Department of Public Buildings (Aaron Shields) will administer and manage project construction. It is anticipated that construction will begin in the early spring of 2018 and be completed by mid to late summer of 2018. The City will be responsible for coordinating the work and ensuring that proper erosion and drainage control measures are maintained throughout construction.
