Re: Portland Retirement Residence

Dear Sir:

Your building application to construct a Retirement Complex, has been reviewed and a building permit is herewith issued subject to the following requirements. This permit does not excuse the applicant from meeting applicable State and Federal rules and regulations.

1. All site plan requirements must be completed before a Certificate of Occupancy can or will be issued.
2. This permit does not preclude the applicant (s) from obtaining plumbing and electrical permits.
3. A list of all sub-contractors with their address and telephone numbers shall be supplied to this office as soon as possible.
4. Special Inspection shall be done in accordance with section 1705.0 of the city'sbuilding. (The BOCA National Building Code /1996).
5. The proposed Atrium shall be constructed in accordance with section 404.0 of the building code.
6. Class C roof covering is the minimum allowed.
7. Structural loads must designed to the BOCA National Building Code/1996.
8. All wood construction shall be done in accordance with Chapter 23 of the building code.
9. All wood fastening shall be done in accordance with Table 2305.2.
10. Glass and glazing shall be installed and done in accordance with chapter 24 of the building code.

If you should have any questions on these requirements please call me at 207-874-8704.

Sincerely

P.Samuel Hoffses

Ref: fire alarm system

Dear Sir,

The review process for your fire alarm system is with the local authority having jurisdiction. In this case this is the Portland Fire Department. If you want the fire alarm system reviewed by the State Fire Marshall that is your choice. Please allow aleast 3 weeks for a review by the fire marshalls' office.

If you have any further questions please call me at 874-8405.

Sincerely,

H. Gaylen McDougall

Sam,

- In response to the snow-loading question: the calculations have been reviewed and it seems the wrong loading was used. I will send revised structural drawings on 6-17-98. The changes will be minor; approximately 4 sheets are affected.
- Also I will be sending revised plumbing, mechanical and electrical sheet with the proper engineering stamp. We are using a temporary stamp while we apply for reciprocity.
- Finally, the revised bond will be sent to planning next week.

Please give me a call if you have any questions.

Dear Mr. Johnson,

Please be advised that further development of the "paths" at the above location must cease immediately until such time as the paths are adequately protected to insure that they function as intended. All work on said paths must stop and plans must be submitted for review. Work cannot resume until the means of protection is approved . If there are questions, please feel free to contact me at 874-8700.

Re 257 Canco Rd. Walkway

Pursuant to our conversation, you are released from the stop order issues on 7/12/99 and can commence development of the walkway as shown on the plan. Owen McCullough must submit the bollard plans and the plan for sidewalk relocation prior to the commencement of the construction/installation of those features. To be clear; this authorizes you to begin the previously approved work in strict compliance with those plans ONLY. The Bollard & Sidewalk relocation cannot commence until plans have been submitted and approved.

Preliminary Site Plan Submittal
Portland Retirement Residence and Assisted Living Facility

Dear Alex:

On behalf of Curry Brandaw Architects and Colson & Colson General Contractor, Inc., Sebago Technics, Inc. has assembled the following preliminary site plan submittal for planning staff and Planning Board consideration. The enclosed submittal presents a proposed retirement residence and assisted care living facility to be located on a 19.97 acre parcel of land on Canco Road.

This project was previously presented to the Planning Board and City Council at a conceptual plan level to acquire a conditional rezoning of the parcel (from OP - Office Park to R5A and ROS Conditional Use). As presented at the previous meetings and as shown on the plans enclosed with this submittal, the project will entail a 211 unit retirement residence and assisted living facility. The project will be constructed in two phases, with this submittal requesting review of Phase I only. Phase I construction will entail 114 retirement suites, 8 cottage units, and 5 garden suites, for a total of 127 initial units. Phase I construction will also include construction of two entrances onto Canco Road, installation of granite curbing and sidewalk between the two entrances as requested by Public Works, along with interior roadways, parking and circulation areas. The second phase of the project will include 80 assisted living suites and 4 cottage suites for a total of 84 additional units. At project completion, there will be a total of 211 suites.

As required by the conditional rezoning, the project will maintain undisturbed natural buffers in the ROS Zone (see enclosed site plan), with the exception of clearing and disturbance necessary for utility construction and construction of a 5' stone dust walking path. An aggressive landscape plan is also proposed as part of the facility construction which is in the process of being completed by Curry Brandaw Architects. This plan will be forwarded to the City upon completion and will be presented at the workshop meeting. In regard to facility construction, it is anticipated that, upon site plan approval by the City of Portland, Phase I construction would begin with an expected completion in the Fall of 1998. Depending on occupancy of Phase I, Phase II is anticipated to be permitted and constructed in 1999, or early 2000.

Canco Rd
Holiday Retirement

At this time, the applicant would like to proceed with the Phase I permitting and design, with the Phase II design and permitting occurring at a later date. The Phase I design has been coordinated with Phase II to allow future extension of utilities and access roadways to the Phase II area. A separate stormwater infrastructure will be utilized for each of the phases which generally corresponds to the topographical conditions in the project vicinity. During our initial planning and design, a coordination meeting was held with the planning and Public Works staffs to review the intended project design. As part of that discussion, Tony Lombardo of the Public Works staff requested that the stormwater design for Phase I be constructed to retain the 2-year storm event in its entirety, releasing it slowly over a 24-hour period. This is intended to lower the peak rates of runoff below pre-development conditions and provide water quality treatment to address concerns over downstream stormwater receiving channels. A detailed stormwater management evaluation will be completed as part of the site plan review process. The enclosed plans include a site specific grading and drainage plan depicting the intent of the stormwater management system which includes detention ponds and erosion and sedimentation control measures.

Utility service to this project will include public water, sewer and underground electric and telephone. We have already met with the Portland Water District to review servicing this project and will be forwarding the final design plans for their review and approval. In addition, we have contacted the Department of Public Works and have obtained a letter indicating that the City of Portland has adequate capacity to transport and treat the anticipated wastewater flows from the development. Underground electric and telephone services will also be coordinated with the respective utility agencies as the design and permitting process progresses.

At this time, we would like to reintroduce the project to the Planning Board at a workshop level to review the design in more detail and discuss the project's aspects. In this regard, we have included the following information for the planning staff and Planning Board's consideration:

1. Preliminary Site Lighting, Grading, Drainage and Utility Plans
2. Landscape Plan
3. 11" x 17" copies of the building elevations and floor plan
4. 11" x 17" reductions of the proposed Site Lighting, Grading and Utility Plans
5. Sewer capacity letter from the City of Portland Public Works Department
6. A copy of the purchase/sale agreement indicating right, title and interest to the property.
7. A traffic study of the project and general vicinity prepared by Eaton Traffic Engineering.

On behalf of the applicant, we look forward to meeting with the Planning Board at the upcoming workshop meeting to present and discuss the proposed retirement residence and assisted care living facility.

Thank you for your consideration.

Sincerely,

SEBAGO TECHNICS, INC.

Owens A. McCullough, P.E.
Project Manager

PURCHASE AND SALE AGREEMENT

THIS AGREEMENT made this 20th day of ~~May~~ June UEC T.P.O. 1997, by and between **Black Bear Development, Inc.**, a Maine corporation having a principal place of business at 30 Ledgewood Drive in the Town of Falmouth, County of Cumberland, State of Maine (hereinafter referred to as "Seller") and **Colson & Colson Construction Co.**, a partnership having a principal place of business at 2250 McGilchrist Street, Salem, Oregon 97302 (hereinafter referred to as "Buyer")

WITNESSETH

Whereas, the Seller desires to sell to Buyer and Buyer desires to purchase from Seller, Seller's land (hereinafter referred to as the "Property") situated at Canco Road in the City of Portland, County of Cumberland and State of Maine consisting of approximately 20 acres of land situated on the easterly side of Canco Road in said Portland and being shown on the City of Portland tax records Map 149 Block B Lot No. 1. The real estate is more particularly described on the plan attached hereto as Schedule A and incorporated by reference herein.

NOW THEREFORE; in consideration of Buyer's earnest money deposit and other valuable considerations paid, the receipt and sufficiency whereof are hereby acknowledged, and the mutual covenants, terms and conditions herein contained, the parties hereto agree as follows:

1. **Purchase and Sale of Real Estate:**

Buyer agrees to purchase from Seller and Seller agrees to sell to Buyer, on the terms and conditions hereinafter set forth, the real estate situated on the easterly side of Canco Road, Portland, Maine consisting of 20.99 acres more or less, as more particularly described in **Schedule A,** ("the Property").

2. **Purchase Price:**

The purchase price shall be Five Hundred Thousand Dollars ($500,000.00), and shall be payable as follows:

a. Upon the execution of this Agreement, Buyer shall pay as an earnest money deposit the sum of Twenty-Five Thousand Dollars ($25,000.00) to be applied to the Purchase Price at closing and placed in an interest-bearing escrow account at the First American Title Insurance Company, ("the Title Company"), South Portland, Maine, office until closing. In the event that First American Title Insurance Company is unable or unwilling to accept the aforesaid earnest money deposit said funds shall be deposited with the Broker until closing. All interest upon such escrow shall be disbursed with the principal to the party receiving the escrow disbursement.

(l) Unless the closing of this transaction has taken place sooner, Buyer shall pay to the Title Company or Broker as the case may be an additional earnest money deposit of Two Thousand Five Hundred Dollars ($2,500.00) on the sixtieth day (60th) and a like sum on the ninetieth (90th) following the execution of this Agreement.

b. The balance of the purchase price, shall be paid at closing as follows:

(l) One Hundred Seventy-Five Thousand Dollars ($175,000.00) in cash or with certified bank or cashier's check. Buyer and Seller agree that Seller shall apply so much of said sum as is necessary to satisfy the first mortgage on the Property held by Peoples Heritage Bank.

(2) Two Hundred Ninety-Five Thousand Dollars ($295,000.00) in the form of a promissory note secured by a first purchase money mortgage, on the Property described on **Schedule A**. Interest on said note shall be at the rate of eight percent (8%) per annum and shall be for a term of the sooner of, the issuance of a building permit by the City of Portland, or twenty-four (24) months from the date of closing. Upon the occurrence of the earlier event the entire principal balance with all accrued but unpaid interest shall be then immediately due and payable. Payments of interest only shall commence thirty (30) days from the date of closing and continue until the principal balance has been paid in full.

3. **Conveyance of Title:**

Seller shall execute and deliver to Buyer a Quitclaim Deed with Covenant for the Real Estate described in **Schedule A**, conveying to Buyer the Property in fee simple, with good and marketable and insurable title thereto, free and clear of all liens and encumbrances, except utility easements and easements serving the premises, zoning and land use laws, and current real estate taxes not yet due and payable to the City of Portland, Maine.

By his letter of March 4, 1997, counsel for the Buyer notified Seller, that according to Buyer's counsel and State Counsel for Buyer's Title Insurer ("State Counsel"), a quitclaim deed from the City of Portland, Maine, releasing any interest it may have in the "paper streets" within the Property would be required and Seller must furnish affidavits, satisfactory to Buyer's Counsel and State Counsel regarding the use and duration of pathways observed on the Property. Buyer's Counsel, and Seller's Counsel agree that those issues would be resolved to the satisfaction of all parties upon receipt of a quit claim deed from the City of Portland, Maine releasing any interest it may have to the "paper streets", and by furnishing an affidavit or affidavits to State Counsel in such form as he shall require.

Except as noted above in the event that Seller cannot, on the closing date, deliver title in such condition, Buyer shall notify Seller of such fact and Seller shall have a reasonable time, but in no event longer than sixty (60) days to remove any objectionable title defect. If such defect cannot be removed by Seller, Buyer may accept such title as Seller can deliver without reduction in the purchase price, or at the Buyer's option terminate this Agreement, in which case both parties shall be released from their obligations hereunder and all funds not otherwise made nonrefundable,

theretofore deposited by Buyer, together with accrued interest thereon, shall be immediately returned to Buyer.

4. **Closing:**

The closing shall take place at the offices of the Seller's attorney, Joseph R. Mazziotti, 470 Forest Avenue Suite 300, Portland, Maine 04101 one hundred twenty (120) days from the execution of this Agreement, unless Seller and Buyer mutually agree to another time or location. Time is of the essence of this Agreement.

Buyer, at its option, may extend the time for closing for periods of thirty (30) days each upon written notice of its intention to do so given to the Seller not later than fifteen (15) days prior to the time set for closing. Buyer shall pay to Seller the sum of Five Thousand Dollars ($5,000.00) for each thirty (30) day extension, paid at the time of its notice to extend the closing. The aforesaid payments shall be non-refundable and shall not be credited toward the purchase price.

5. **Prorations:**

Real estate taxes for the current tax year shall be prorated between Buyer and Seller as of the date of closing. Seller and Buyer shall share equally in the real estate transfer tax and Buyer shall pay recording fees for the deed and mortgage.

6. **Buyer's Contingencies:** Buyer's obligation to close hereunder is subject to the following conditions, which conditions may at any time be waived by Buyer:

(1) Buyer shall have thirty (30) days from the date of this Agreement to notify Seller or any additional title objections or title defects not otherwise identified in this Agreement. Failure of Buyer to so notify Seller within the time aforesaid shall be deemed a waiver of this contingency.

(2) Buyer's satisfactory inspection of current surveys, legal descriptions, availability and engineering of all utilities (including public water and sewer), and including soils analyses, wetlands studies, conservation conditions, survey work and Phase 1 Site Assessment. All such inspections shall be conducted by Buyer within thirty (30) days of the execution of this Agreement. Buyer shall be solely responsible for all costs and expenses of whatever nature incurred thereby and shall indemnify and hold Seller harmless from any claims or causes of action arising from buyer's exercise of its rights to conduct such inspections. Buyer agrees to restore the real estate to substantially the condition existing prior to any such tests, surveys or inspections, etc. and to the reasonable satisfaction of the Seller. Buyer agrees that it shall provide Seller with a copy of all reports, summaries, conclusions and materials prepared as result of the above described site review as completed. The failure of Buyer to notify Seller of any objectionable report and finding within the aforesaid thirty (30) days shall be deemed a waiver of this contingency. Seller agrees to cooperate with Buyer during its site review and agrees to furnish copies of plans and inspection reports in its possession.

(3) Buyer shall have 120 days from the execution of this agreement to obtain, to Buyer's satisfaction, the following: City of Portland approval or a contract zone, or such permits and/or variances, (including parking variance) or conditional use permits for development of Buyer's senior congregate residential living facility for not fewer than a combined total of not fewer than one hundred ten (110) suites and cottages. Buyer agrees, that as a part of its application for a contract zone it will include the condition that the City of Portland release by quit claim deed its interest in any of the "Paper Streets" located within the Property.

7. **Assignment:** Buyer shall have the unrestricted right to assign its rights and obligations hereunder to any entity controlled by or affiliated with Buyer. Seller reserves the right to reject any such assignment to any individual or entity which lacks sufficient credit worthiness to satisfy Seller which determination shall be in the sole discretion of Seller. Notwithstanding the foregoing, any assignment of the obligations hereunder shall not relieve the Buyer from its primary liability for the repayment of the note and mortgage to the Seller.

8. **Earnest Money Deposit, Liquidated Damages:**

Should the Buyer fail to make any payment required under the terms of this Agreement, or to perform any of the covenants on its part made, this Agreement shall, at the option of the Seller, be terminated and Buyer shall unconditionally release the earnest money deposit or deposits as the case may be, to the Seller as liquidated damages.

9. **Seller's Default:**

If Seller is unwilling or unable to close pursuant to this contract, Buyer shall be entitled to the immediate return of its earnest money deposit held by the Seller and Seller shall be relieved from any further responsibilities and obligations under this Agreement.

10. **Notice:**

All notices required under the terms of this Agreement, shall be given in writing to the party designated, by certified mail postage prepaid return receipt requested and addressed as follows:

RE: Sanitary Sewer Capacity to Handle Anticipated Wastewater Flows from the Proposed Holiday Retirement Corporation Development

Dear Owens:

The existing twelve inch diameter vitrified clay sanitary sewer pipe "stub" located in Lee Street, at Murray Street, and the sewage treatment facilities, in the City of Portland, have adequate capacity to transport and treat the anticipated wastewater flows of 25,320 GPD, from your proposed retirement housing complex to be located at 185 Canco Road, City of Portland.

Proposed Wastewater Flows from the Proposed Retirement Residence Complex	
Proposed 211 units @ 120 GPD/unit	= 25,320 GPD
Total Proposed Increase in Wastewater Flows for this Project	= 25,320 GPD

The City is requesting that you remove storm water at a five to one level of your anticipated increase in wastewater flow (i.e. 5 X 25,320 GPD = 126,600 GPD) or obtain removal credits from the City. Stormwater inflow should be calculated on the basis of a three month recurrence interval storm.

If I can be of further assistance, please call me at 874-8832.

Sincerely,
CITY OF PORTLAND

November 1997

HOLIDAY RETIREMENT VILLAGE
Canco Road - Portland, Maine
Traffic Impact Study

Introduction

Holiday Retirement Corp. of Salem, Oregon proposes to construct a 211 unit retirement complex consisting of 114 Retirement Suites (Apartments), 12 Cottage Suites, 5 Garden Suites, and 80 Assisted Living Suites on the easterly side of Canco Road in Portland, Maine. Proposed access to the site will be via two two-way driveways on Canco Road, one being located at the crest of a vertical curve opposite the Granite Heights office facility, and one opposite the Seltzer & Rydholm exit driveway. Figure 1 on the following page presents the site location and proposed access points. The development is proposed to occur in two phases. Phase 1, to be completed in 1998, will consist of the 114 Retirement Suites, 8 Cottage Suites, and 5 Garden Suites. Phase 2, to be completed in 2000, will consist of the 80 Assisted Living Suites and 4 additional Cottage Suites.

The purpose of this traffic impact study is to evaluate the impact of new traffic generated by the proposed facility on roadway in the vicinity of the site.

Area Characteristics

Canco Road is a 2 lane roadway with a paved travelway 44 feet in width. In the vicinity of the proposed north access driveway, there is a 5 foot sidewalk on the westerly side of Canco Road, with a 4 foot grass strip separating the sidewalk from Canco Road. The shoulder on the easterly side of the street is gravel and 6 - 8 feet in width. There are no recent MDOT traffic counts on Canco Road. Based upon PM peak hour traffic counts conducted for this study, daily traffic volume is estimated at 6,500 - 7,000 vehicles. Land use on Canco Road is primarily commercial in nature, with the exception of a Church located near the Washington Avenue/Canco Road intersection. The intersection of Washington Avenue with Canco Road is controlled by a fully actuated traffic signal, which also controls traffic on nearby Ray and Lawrence Streets. Washington Avenue is basically a two lane roadway, however auxillary turn lanes are provided at the signal controlled intersection. The posted speed limit on Canco Road is 40 MPH.

Figure 1
Site Location and Access

HOLIDAY RETIREMENT VILLAGE - CANCO ROAD - PORTLAND, MAINE

Estimated 1998 and 2000 PM Peak Hour Traffic - Pre-Development

Traffic impact analysis is typically conducted for a peak one hour period of time when traffic flow on streets adjacent to a proposed development are at their highest level. Normally this peak one hour will occur in the late afternoon within the period 4:00 - 6:00 PM. Accordingly, a manual count was conducted at the Washington/Canco/Ray/Lawrence intersection from 4:00 - 6:00 PM on Wednesday, October 29, 1997. Turning movement count data is normally adjusted to reflect a seasonal peak traffic condition using MDOT adjustment factors derived from their statewide continuous traffic counting program. In this particular case, an increase in the October count of 10 percent was necessary to reflect peak seasonal traffic flow. In past studies in Portland, use of seasonal factors has resulted in traffic volume estimates that are higher than actually occur. This is particularly true in areas where seasonal variation is minimal, which would be expected for Washington Avenue and Canco Road, as they are not generally used by summer visitors.

Traffic counts on Washington Avenue northwest of Canco Road for the period 1992 to 1994 showed a decline in traffic volume. To provide a conservative (i.e. high) estimate of 1998 and 2000 peak hour traffic in the area, a growth rate of 1 percent per year was applied to the seasonally adjusted 1997 estimate. Figures 2A and 2B on the following pages present the estimated 1998 and 2000 PM peak hour traffic volumes for the pre-development, or base condition.

Site Generated Traffic

Site generated PM peak hour traffic for the proposed development was estimated using the statistics contained in the publication Trip Generation - Fifth Edition[1], and a report entitled Assisted Living Residences - A Study of Traffic And Parking Implications[2]. The tables on the following page summarizes the estimation of PM peak hour traffic generation for Phases 1 and 2.

Estimated 2000 PM Peak Hour Traffic - Pre-Development

HOLIDAY RETIREMENT VILLAGE - CANCO ROAD - PORTLAND, MAINE

Holiday Retirement Village - Site Generated PM Peak Hour Traffic

Phase 1

Unit Type	Number of Units	Rate	Trips
Retirement Suite	114	0.28	32
Cottage Suite	8	0.55	4.4
Garden Suite	5	0.28	1.4
Total	127	na	37.8 ~ 38

Holiday Retirement Village - Site Generated PM Peak Hour Traffic

Phase 2

Unit Type	Number of Units	Rate	Trips
Assisted Living Suites	80	0.43	34.4
Cottage Suites	4	0.55	2.2
Total	84	na	36.6 ~ 37

Holiday Retirement Village - Site Generated PM Peak Hour Traffic

Phases 1 & 2

Phase	Number of Units	Trips
1	127	38
2	84	37
Total	211	75

Directional distribution of the PM peak hour traffic, according to ITE data for facilities for retired people, is approximately 55 percent entering and 45 exiting. Traffic for Phase 1 and Phase 2 was assigned to Canco Road and the Washington/Canco intersection based upon existing directional patterns on Canco Street, which indicate that 70 percent of the traffic will be oriented to the south, and 30 percent to the north. This is generally consistent with traffic patterns observed in a previous traffic study at the Department of Motor Vehicles/DEP Regional Office located on the west side of Canco Road north of the proposed Holiday site (the directional split was 75 percent south 25 percent north in that study). Figure 3 on the following page presents the assignment of 1998 (Phase 1) and 2000 (Phase 2) site generated PM peak hour traffic.

Figure 3
Estimated Site Generated PM Peak Hour Traffic for Phases 1 and 2

HOLIDAY RETIREMENT VILLAGE - CANCO ROAD - PORTLAND, MAINE

Projected 1998 and 2000 Post-Development PM Peak Hour Traffic

Projected 1998 and 2000 post-development PM peak hour traffic is the arithmetic combination of the estimated 1998 and 2000 pre-development volumes shown in Figures 2A and 2B and the estimated PM peak hour site generated traffic shown in Figure 3. Figures 4A and 4B present projected 1998 and 2000 post-development PM peak hour traffic volumes in the study area.

Operational Assessment of Pre- and Post-Development Traffic Volumes

Capacity analysis for pre- and post-development 1998 and 2000 PM peak hour traffic estimates/projections for the Washington Avenue @ Canco/Ray/Lawrence intersection was conducted per the procedures contained in the Highway Capacity Manual[3]. Capacity analysis provides a quantitative assessment of the quality of traffic flow at an intersection, and "rates" this quality in terms of its Level of Service (LOS). LOS ratings range from A to F, and much like a school rank card, A indicates very good conditions, and F indicates extremely congested conditions. For signalized intersections, LOS is related to average stopped delay incurred by vehicles using the intersection. The table below presents the relationship between delay and LOS.

Signalized Intersection Level of Service Measures

Level of Service	Average Stopped Delay Per Vehicle
A	≤ 5.0 Seconds
B	5.1 - 15.0 Seconds
C	15.1 - 25.0 Seconds
D	25.1 - 40.0 Seconds
E	40.1 - 60.0 Seconds
F	> 60.0 Seconds

The results of analysis for the signalized intersection are summarized below:

Figure 4B
Projected Post-Development PM Peak Hour Traffic - 2000/Phase 1 & 2

HOLIDAY RETIREMENT VILLAGE - CANCO ROAD - PORTLAND, MAINE

Signalized Intersection Analysis

1998

Location	Pre-Development		Post-Development	
	LOS	Stopped Delay (sec)	LOS	Stopped Delay (sec)
Washington/Canco/Ray/Lawrence	D	31.4	D	32.3

Signalized Intersection Analysis

2000

Location	Pre-Development		Post-Development	
	LOS	Stopped Delay (sec)	LOS	Stopped Delay (sec)
Washington/Canco/Ray/Lawrence	D	35.6	D	37.7

The intersection is heavily travelled and has some inherent inefficiencies due to the size of the control area, which requires lengthy vehicle clearance intervals. In order to get the analysis to work properly, some relatively liberal assumptions regarding lost time on the Washington Avenue were made (normal lost time is assumed to be 3 seconds - in this case it was reduced to 1 second for the through movements). While the LOS overall is considered to be acceptable, it should be noted that some of the movements at the intersection operate at LOS E or F. As can also be seen, the impact of the new traffic generated by the proposed facility is relatively minimal.

Analysis of the unsignalized intersections of the proposed access driveways on Canco Road uses a different procedure and has different standards for determining LOS. LOS for unsignalized intersections is based upon average total delay for vehicles using an intersection, which takes into account the delay involved in waiting in a vehicle queue. The relationship between LOS and average total delay is shown below:

Level of Service Measurement for Unsignalized Intersections

Level of Service	Average Total Delay Per Vehicle
A	≤ 5.0 Seconds
B	5.1 - 10.0 Seconds
C	10.1 - 20.0 Seconds
D	20.1 - 30.0 Seconds
E	30.1 - 45.0 Seconds
F	≥ 45.0 Seconds

The results of analysis for the unsignalized intersections of are summarized below:

Unsignalized Intersection Analysis

Location	1998 Post-Development		2000 Post-Development	
	LOS	Average Total Delay (sec)	LOS	Average Total Delay (sec)
Canco Road @ North Drive				
SB Left from Canco	A	3.7	A	3.8
All moves from Driveway	B	7.1	B	7.4
Total Intersection		0.1		0.2
Canco Road @ South Drive				
SB Left from Canco	A	3.8	A	3.9
All Moves from Driveway	B	9.0	B	9.4
Total Intersection		0.3		0.3

As can be seen, both driveways are projected to operate satisfactorily.

Safety

Safety data for the most recent available 3 year period (1994-96) was obtained from the Accident Records Section of the MDOT Bureau of Planning for roadways in the vicinity of the site. A summary of the accident history in the area is presented in the table below.

1994-96 Accident History in Site Vicinity*

LOCATION	1994-96 ACCIDENTS	ANNUAL AVERAGE	CRITICAL RATE FACTOR[4]
Canco Road @ Read	13	4.33	2.23
Canco Road/ Read to Washington	5	1.67	0.26
Canco Road @ Washington	24	8.00	0.64
Washington Ave/ Canco to Ray	5	1.67	1.07
Washington Ave @ Ray	13	4.33	0.38
Washington Ave/ Canco to Lawrence	5	1.67	1.41
Washington Ave @ Lawrence	3	1.00	0.23

MDOT guidelines for identification of a High Accident Location (HAL - indicating a potential safety deficiency) is that a location must experience 8 or more accidents in a 3 year period and have a Critical Rate Factor of 1.00 or greater. One of the locations above - Canco Road @ Read Street satisfies these criteria. Accordingly a detailed collision diagram of this location was prepared from accident reports on file at MDOT, and analyzed. A summary of the findings is as follows:

Canco Road @ Read Street: One accident occurred in 1994, two in 1995 and ten in 1996. The accidents in 1994 and 1995 all occurred in snow or ice conditions where vehicles could not stop. The jump from 1 to 2 accidents a year to 10 is rather significant and may simply be an anomaly. Five of the 10 accidents in 1996 did occur when pavement conditions were poor - snow, ice, et cetera. Of the remaining five accidents, one occurred on Read Street north of the Canco/Read intersection and should not have been included with accidents at the intersection. One collision involved a vehicle backing on Canco Road to enter a driveway that the driver had driven by. Two accidents involved vehicles turning left from Read Street eastbound and hitting vehicles stopped at the stop sign on Canco Road (one of these a hit-and-run), and the final non-climatic accident was an angle collision where a driver on Canco Road entered the intersection and was struck by a vehicle westbound on Read. Overall it appears that pavement condition has a major

[4] The Critical Rate Factor is a statistical measure which compares the accident frequency at a location to similar locations throughout the State. A Critical Rate Factor of 1.00 or greater indicates that the location has a higher frequency of accidents than would be expected due to random occurrence, with a 99 percent level of confidence.

impact on safety at this location, with 8 of 12 accidents occurring on slippery pavement. Of the 4 accidents not involving poor pavement conditions, there simply is no pattern that would indicate a physical or operational deficiency. It is recommended that this location be monitored to determine whether the significant increase in accidents in 1996 represents a new trend or simply a fluke occurrence.

An additional safety consideration is the amount of sight distance available for vehicles exiting the proposed site driveways. Field measurements indicate available sight distance along Canco Road in excess of 750 feet both north and south of the north driveway (near Granite Heights). At the south driveway distance to the south exceeds 750 feet, and to the north is limited to 525 feet by the crest vertical curve near Granite Heights. These sight distances are adequate for speeds in excess of 50 MPH for low and medium volume driveway sight distance guidelines. The posted speed limit on Canco Road is 40 MPH.

Summary of Findings

The proposed Holiday Retirement Village is projected to generate 38 PM peak hour vehicle trips in Phase 1 of the development (1998) and an additional 37 vehicle trips in Phase 2 (2000) for a total PM peak hour traffic generation of 75 vehicle trips. Analysis of the operation of the intersection of Washington Avenue @ Canco/Ray/Lawrence indicates that the additional PM peak hour traffic generated by both phases of the proposed development will have a minimal impact on the Level of Service at the intersection during peak seasonal traffic flow periods. It should be noted that the intersection is currently handling a very large volume of traffic, and significant delays are incurred on several of the approaches to the intersection. The intersections of the proposed site driveways and Canco Road are projected to operate at a satisfactory level of service for both Phases 1 and 2. An investigation of the accident history in the vicinity of the site indicates that there is one High Accident Location in the area - the intersection of Canco Road @ Read Street. Of the 12 accidents occurring at this location, 9 occurred in 1996, representing a major increase in frequency. Detailed analysis of the accidents indicated that the majority (8) occur when pavement conditions are poor. Those not related to pavement condition do not evidence any pattern that would identify any inherent deficiency. Monitoring of the intersection is recommended. Sight distance for vehicles exiting the access driveways on Canco Road is more than adequate for the posted speed limit of 40 MPH.

DRC Conditions of Approval

- that the Development Review Coordinator's comments be addressed relating to book and page for easements, access door, emergency wier, and length of level lip spreaders, the confirmation of state permits not required and documentation of treatment pond calculations and maintenance

Planning Conditions of Approval

- that the applicant provide a revised deed for public access, in a form acceptable to the City's Corporation Counsel recognizing the existence of the Portland Trails trail.
- that the remaining sidewalk and granite curb be installed at such time that the abutting property be developed or at the time that Phase II is developed or within five (5) years, whichever is first.
- replacement of two (2) catch basins in Canco Road, located across from the south-westerly site boundary, and replacement of the existing cross culvert connecting these basins with a pipe of appropriate size and avoiding conflict with the existing sanitary sewer manhole.
- replacement of the outfall pipe which drains these two catch basins and directs runoff towards the existing swale located on the southwesterly abutting property.

Inspections Conditions of Approval

1. Any revisions to layout, shall require an amendment.
2, Exterior Signage requires a separate permit.

Fire Conditions of Approval

Applicant must have state fire marshall approval
hydt shall comply with the portland water district and city of portland standards

Re: Portland Retirement Residence

Dear Sir:

Your building application to construct a Retirement Complex, has been reviewed and a building permit is herewith issued subject to the following requirements. This permit does not excuse the applicant from meeting applicable State and Federal rules and regulations.

1. All site plan requirements must be completed before a Certificate of Occupancy can or will be issued.
2. This permit does not preclude the applicant (s) from obtaining plumbing and electrical permits.
3. A list of all sub-contractors with their address and telephone numbers shall be supplied to this office as soon as possible.
4. Special Inspection shall be done in accordance with section 1705.0 of the city's building code. (The BOCA National Building Code /1996).
5. The proposed Atrium shall be constructed in accordance with section 404.0 of the building code.
6. Class C roof covering is the minimum allowed.
7. Structural loads must designed to the BOCA National Building Code/1996.
8. All wood construction shall be done in accordance with Chapter 23 of the building code.
9. All wood fastening shall be done in accordance with Table 2305.2.
10. Glass and glazing shall be installed and done in accordance with chapter 24 of the building code.

If you should have any questions on these requirements please call me at 207-874-8704.

Sincerely,

P.Samuel Hoffses
Inspector of Buildings

RE: Portland Retirement Residence

Dear Owens:

On March 10, 1998 the Portland Planning Board voted unanimously to approve the site plan and site location of development for Portland Retirement Residence at 219 Canco Road. The approval was granted for the project with the following conditions:

i. that the applicant provide a revised deed for public access, in a form acceptable to the City's Corporation Counsel recognizing the existence of the Portland Trails trail.

ii. that the remaining sidewalk and granite curb be installed at such time that the abutting property be developed or at the time that Phase II is developed or within five (5) years, whichever is first.

iii. replacement of two (2) catch basins in Canco road, located across from the southwesterly site boundary, and replacement of the existing cross culvert connecting these basins with a pipe of appropriate size and avoiding conflict with the existing sanitary sewer manhole.

iv. replacement of the outfall pipe which drains these two catch basins and directs runoff towards the existing swale located on the southwesterly abutting property.

v. that the Development Review Coordinator's comments be addressed relating to book and page for easements, access door, emergency wier, and length of level lip spreaders, the confirmation of state permits not required and documentation of treatment pond calculations and maintenance plan.

The approval is based on the submitted site plan and the findings related to site plan review standards as contained in Planning Report #3-98, which is attached.

1-19-8-98

Please note the following provisions and requirements for all site plan approvals:

1. A performance guarantee covering the site improvements as well as an inspection fee payment of 1.7% of the guarantee amount and 7 final sets of plans must be submitted to and approved by the Planning Division and Public Works prior to the release of the building permit. If you need to make any modifications to the approved site plan, you must submit a revised site plan for staff review and approval.

2. The site plan approval will be deemed to have expired unless work in the development has commenced within one (1) year of the approval or within a time period agreed upon in writing by the City and the applicant. Requests to extend approvals must be received before the expiration date.

3. A defect guarantee, consisting of 10% of the performance guarantee, must be posted before the performance guarantee will be released.

4. Prior to construction, a preconstruction meeting shall be held at the project site with the contractor, development review coordinator, Public Work's representative and owner to review the construction schedule and critical aspects of the site work. At that time, the site/building contractor shall provide three (3) copies of a detailed construction schedule to the attending City representatives. It shall be the contractor's responsibility to arrange a mutually agreeable time for the preconstruction meeting.

5. If work will occur within the public right-of-way such as utilities, curb, sidewalk and driveway construction, a street opening permit(s) is required for your site. Please contact Carol Merritt at 874-8300, ext. 8828. (Only excavators licensed by the City of Portland are eligible.)

The Development Review Coordinator (874-8300 ext. 8722) must be notified five (5) working days prior to date required for final site inspection. Please make allowances for completion of site plan requirements determined to be incomplete or defective during the inspection. This is essential as all site plan requirements must be completed and approved by the Development Review Coordinator prior to issuance of a Certificate of Occupancy. Please schedule any property closing with these requirements in mind.

If there are any questions, please contact the Planning Staff.

Sincerely,

John Carroll, Chair
Portland Planning Board

MEMORANDUM

TO: Code Enforcement
Kandi Talbot, Planner

FROM: Eric Barnes, DeLuca-Hoffman Associates, Inc.
Jim Wendel, PE, Development Review Coordinator

DATE: July 29, 1999

RE: Certificate of Occupancy
Portland Retirement (219 Canco Road)

On July 29, 1999 the site was reviewed for compliance with the conditions of approval dated March 10, 1998. Terry Johnson of Colson & Colson and several members of Public Works were met on site. My comments are:

1. No comments. The private portion of the work done has been satisfactorily completed in accordance with the approved site plan.

2. Public Works has some outstanding issues. They will be issuing a memo outlining these various issues.

It is my opinion that **a temporary certificate of occupancy could be issued** assuming Code Enforcement has no outstanding issues. The performance guarantee is still in effect to assure the completion of this work.

The Proven Performers from Field

A Field Draft Inducer is a problem solver and a proven performer. It solves the drafting problems caused by short chimneys, undersized flue pipes and negative building pressures, to name just a few. And it does it economically and reliably.

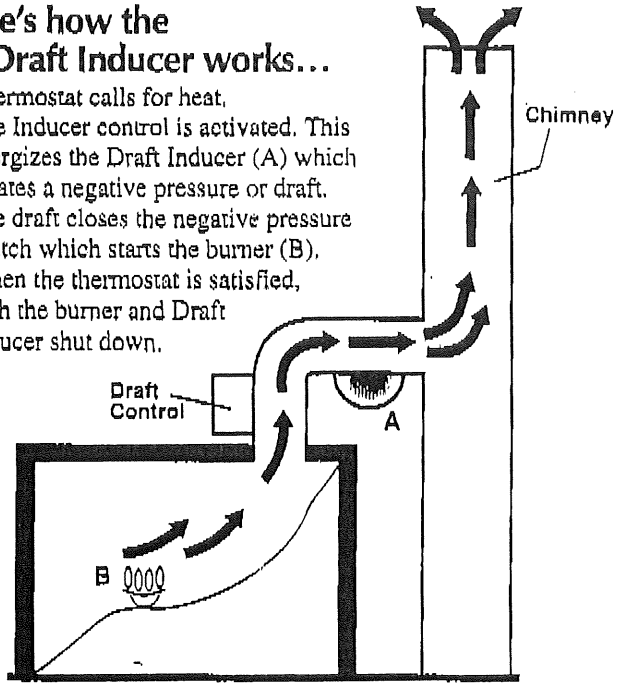
Field Draft Inducers are designed for easy installation in a wide variety of applications, including oil or gas fired furnaces, water heaters and boilers.

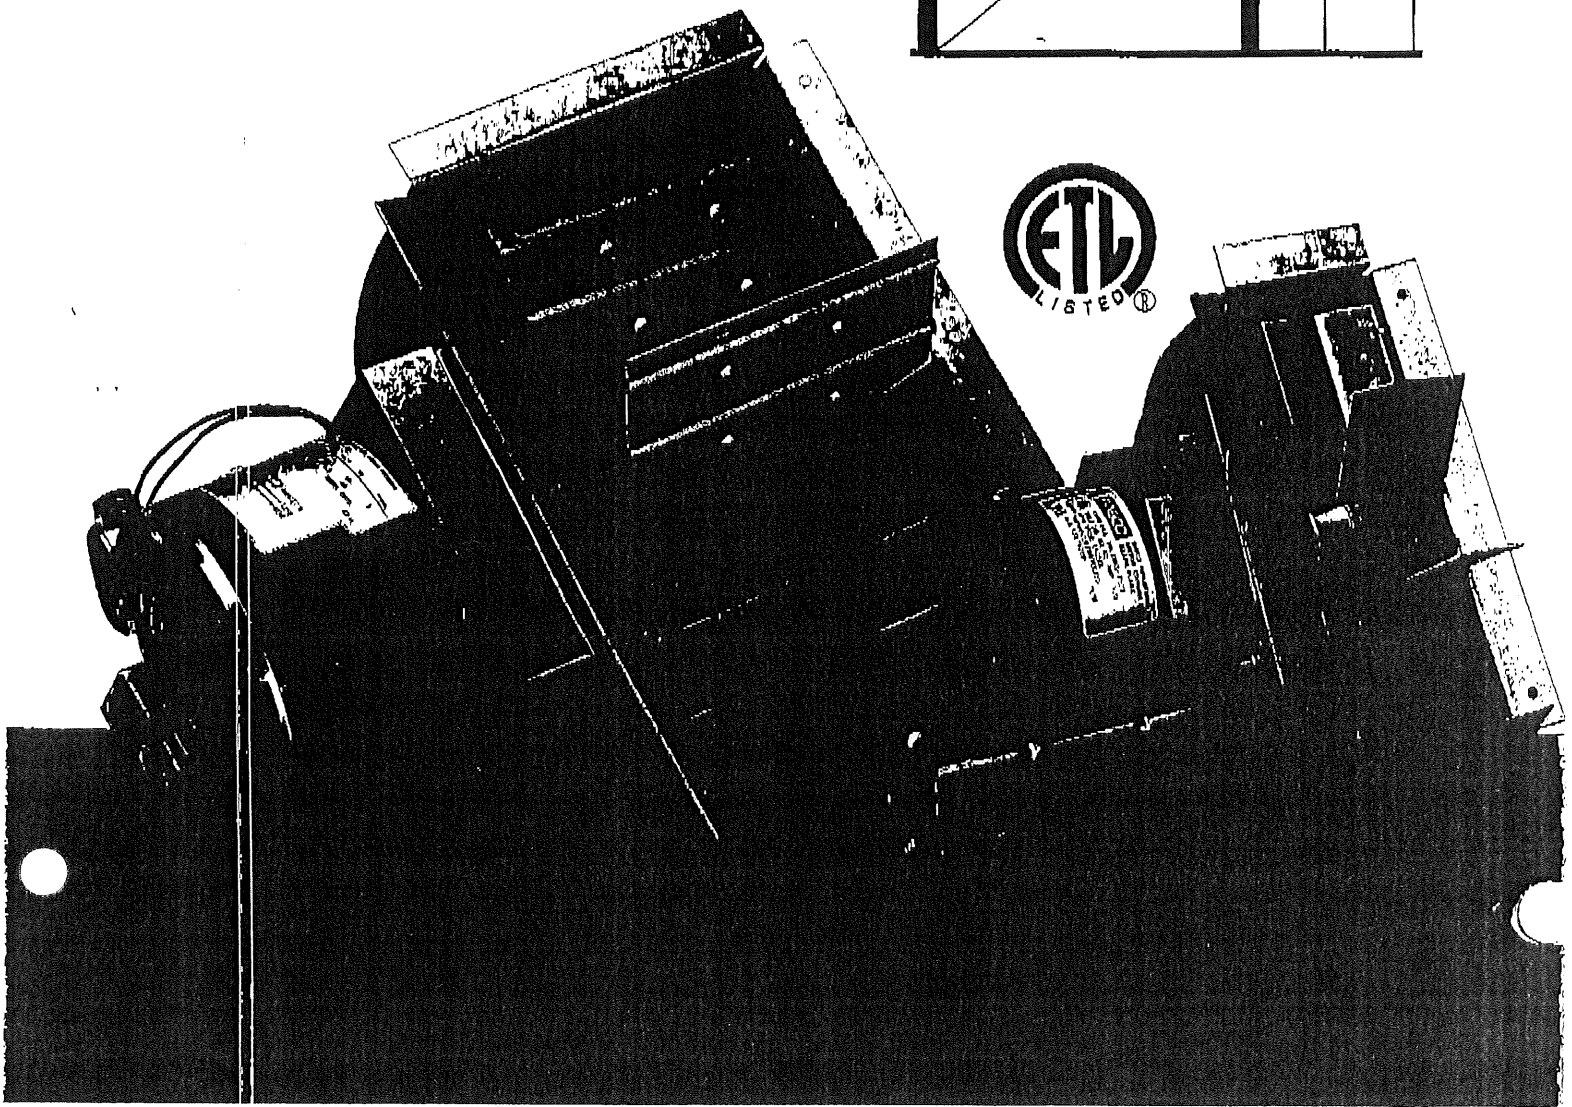
Heavy-duty construction assures you of years of trouble-free operation and satisfied customers. So when you need to solve a draft problem and you want to do it right the first time, specify a Field Draft Inducer.

Field... your venting solutions company.

Here's how the DI Draft Inducer works...

1. Thermostat calls for heat.
2. The Inducer control is activated. This energizes the Draft Inducer (A) which creates a negative pressure or draft.
3. The draft closes the negative pressure switch which starts the burner (B).
4. When the thermostat is satisfied, both the burner and Draft Inducer shut down.



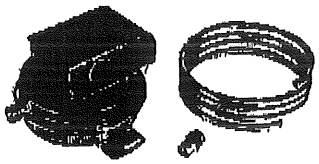


Draft Inducer Operating Controls

All accessories are ETL approved.

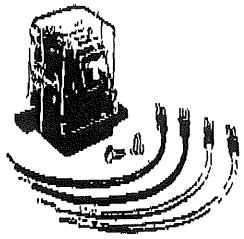
DIP-1 Fan Control

The DIP-1 Fan Control prevents burner operation in the absence of adequate draft by sensing negative pressure in the fan housing.



Relay Kits

RJR-5. This kit is for 24 volt systems and comes complete with relay base and see-through enclosure. RJR-6. For 120 volt control systems. Relay base and see-through enclosure included.



Water Heater Kit

HWK. This kit is for millivolt operated gas valves. It has a pressure switch to operate the draft inducer when the burner fires. Includes two GSK-3 spillage switches and a fixed post purge control.

CK Series Control Kit Options.

Gas Fired Systems

CK-20F	Millivolt, Gas Fired Water Heater Control Kit, Fixed Post Purge Timer.
CK-21	Millivolt, Gas Fired Wall Mounted Instantaneous Water Heater Control Kit.
CK-41	24 VAC, Gas Fired Control Kit.
CK-43	24 VAC, Gas Draft Induced Control Kit with Adjustable Post Purge Control.
CK-43F	24 VAC, Gas Draft Induced Control Kit with Fixed Post Purge Control.
CK-44F	24 VAC, Gas Fired Control Kit with Fixed Post Purge Control.
CK-81	750 Millivolt, Gas Fired Appliances operating with a 24 AC Voltage Thermostat or ON/OFF Switch.
CK-91	24 VAC, Gas Draft Induced Furnace and Millivolt Water Heater Control Kit with Adjustable Post Purge Control.
CK-91F	24 VAC, Gas Draft Induced Furnace and Millivolt Water Heater Control Kit with Fixed Post Purge Control.
CK-92F	24 VAC Gas Fired and Millivolt Water Heater Control Kit with Fixed Post Purge Control.

Typical System Components

Gas Fired 24 VAC Systems

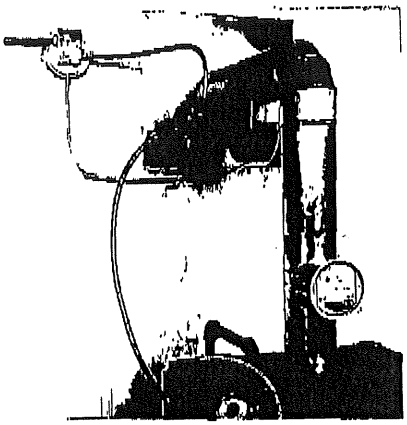
1 DI Draft Inducer
1 DIP-1 Fan Control
1 RJR-5 Relay Kit
1 GSK-3 Spill Switch (optional)
OR
1 DI Draft Inducer
1 CK-41 24 VAC Gas Fired Control Kit

Oil Fired Systems

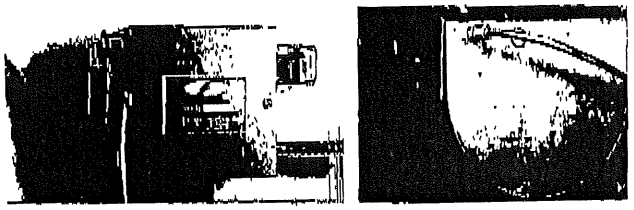
1 DI Draft Inducer
1 DIP-1 Fan Control
1 RJR-6 Relay Kit
1 WMO Secondary Safety Switch (optional)
OR
1 DI Draft Inducer
1 CK-61 120 VAC, Oil Fired Control Kit /with Electronic Post Purge

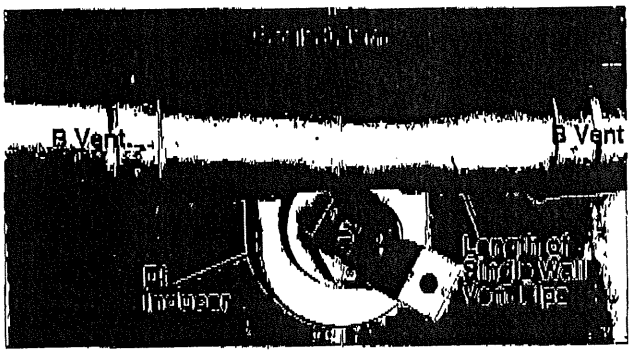
Applications

(At Right)
Draft Inducers installed with DIP-1 switch or standard controls.



(Below)
CK kit installation. Allows more flexibility in choice of location and simplifies installation.





ETL approved method for mounting with B-vent systems.

ETL IS A VIABLE ALTERNATIVE TO UL

ETL Testing Laboratories, Inc. is recognized throughout the United States as a viable alternative to Underwriters Laboratories. The ETL safety label is accepted as being equal to that of Underwriters Laboratories when denoting compliance with nationally recognized Underwriters Laboratories (UL), American National Standards Institute (ANSI) or International Electrotechnical Commission (IEC) standards in a labeling, listing and follow-up program.

ETL, originally organized by the Edison Illuminating Companies, has been conducting performance and reliability tests since 1896. In 1977, we initiated our product safety testing program upon the request of various HVAC manufacturers. Today, after an intensive campaign requiring negotations with more than 1500 civic entities ranging from small cities to entire states, the ETL safety label is a nationally recognized alternative to that offered by Underwriters Laboratories for electrical products, building materials and systems, and gas and oil-fired products. ETL is also an alternative to American Gas Association (AGA) for gas-fired products.

At the present time, ETL is not aware of any jurisdiction in the United States which does not recognize and accept our safety label. Many individual states and municipalities have sent us written confirmation of their acceptance. We have also been evaluated and listed as a nationally recognized laboratory by the major regional building code agencies: Building Officials and Code Administrators International (BOCA) (Northeast U.S.), International Conference of Building Officials (ICBO) (Western U.S.) and Southern Building Code Congress International, Inc. (SBCCI) (Southeast U.S.).

These agencies establish building codes and standards which many municipalities and states adopt as their own code. For example, ICBO is responsible for the Uniform Building Code which is widely used west of the Mississippi River. Since we are recognized by the building code agencies, the civic entities which adopt their codes, accept our testing results.

The Federal Government's Occupational Safety and Health Administration (OSHA) has also designated ETL Testing Laboratories, Inc. as a Nationally Recognized Testing Laboratory under its NRTL Program. ETL received NRTL status to test to over 160 safety and performance standards applicable to workplace related products. This designation re-enforces ETL's acceptance nationwide as an alternative to UL and AGA laboratories.

In addition, mass merchandising and retail establishments such as Sears, J.C. Penney and K-Mart recognize our safety label as equivalent to UL. Sears has sent a newsletter to all their vendors and suppliers notifying them of the acceptance of our safety label. Major corporations such as IBM, Pepsi Cola, McDonalds, and Wang have amended their corporate policies to include ETL.

The efforts required to achieve national parity with UL were long and tedious. In a few cases, ETL had to utilize legal procedures to become accredited. In New York State, our district congressman and assemblyman initiated an amendment to the state law which had previously stipulated UL only. In the state of Oregon, our legal department successfully approached the State Attorney General to qualify the ETL listed equipment of one of our clients who would have lost an order due to the "UL" requirement in the request for quotation of a state procurement division. Civic entities are required to recognize ETL due to the "Restraint of Trade" conditions of the Federal Clayton "Anti-Trust" Act.

ETL has a Technical Advisory Council which consists of chief electrical inspectors and electrical experts from jurisdictions and organizations throughout the country. For example, the chief electrical inspectors of Chicago, City of Los Angeles, County of Los Angeles; the Vice President of the New York Board of Fire Underwriters, and a representative from National Electrical Manufacturers Association and the Consumer Product Safety Commission as well as others participate in our annual meetings and provide policy guidance. In addition to their input, ETL is very active in the International Association of Electrical Inspectors. We regularly participate in local and sectional meetings in order to remain in close contact with them.

Nationally Recognized Testing Laboratories

by Hank Woodcock, Occupational Safety and Health Administration

On April 12, 1988, OSHA established a program to accredit "nationally recognized testing laboratories." This program is an early prototype that could serve as a model for "reinventing government," one of the new goals of the Clinton Administration. In *Reinventing Government*,[1] authors Osborne and Gaebler prescribe catalyzing non-government efforts as one of the innovative approaches for delivering services. Nationally recognized testing laboratories, or NRTLs, use just such an approach to help protect the safety of workers.

NRTLs determine that specific products meet required standards of safety for use in the workplace. These laboratories provide a vital service in OSHA's continuing effort to protect the safety of workers by performing two functions:

- testing products using nationally recognized test standards, and
- assuring that manufacturers can make products meeting specified safety requirements.

To better understand how NRTLs assist OSHA in protecting the safety of workers, it is helpful to look at how the program began and what it takes to be accredited as an NRTL.

The Beginning

Before the NRTL program, OSHA standards designated only two laboratories for certifying product safety: Underwriters Laboratories, Inc. (UL) and Factory Mutual Research Corporation (FMRC). More than 40 references to OSHA standards listed in *Title 29 of the Code of Federal Regulations (CFR), Part 1910* (General Industry), named these two organizations as the sole sources for listing, approving, accepting, labeling, and certifying products. As a result, other testing organizations complained this was preferential treatment that caused them economic hardship.

One of these laboratories filed suit. As a part of a settlement agreement with that organization (*MET Electrical Testing v. Secretary of Labor, No. Y-82-1133, D. Md.*), and after a second suit (*MET Electrical Testing v. Secretary of Labor, No. Y-87-1480, D. Md.*), OSHA developed a regulation for testing labs which established the NRTL program.[2] This regulation substituted "NRTL" for "UL" and "FMRC" in 29 CFR 1910, defined NRTL requirements, and described how a laboratory can be accredited as an NRTL.

Accreditation

To become accredited as an NRTL, a laboratory must be independent and capable of determining conformance with the appropriate test standards for safety.

Only certain test standards apply to the NRTL program. Generally, the NRTL certification program covers electrical conductors and equipment (Subpart S), liquefied petroleum gas appliances, fire detection and extinguishing systems, and acetylene apparatus[3].

Each applicant for status as an NRTL must list the test standards that it intends to use, and then OSHA evaluates the laboratory's capabilities based on this list and by an on-site visit by an assessment team. OSHA is very fortunate to have the support of the Mine Safety and Health Administration (MSHA) to help conduct these detailed assessment. This cooperative effort is another example of reinventing government because it uses existing government talent and resources for new endeavors and solutions.

As a part of the accreditation process, the assessment team visits the applicant laboratory to verify its capabilities, including facilities, test equipment, calibration program, product handling procedures, product evaluation procedures, test procedures, technical reports, technical records, test standards, quality assurance program, internal audits, follow-up program for manufacturers, personnel programs, and other procedures for producing credible findings and objective, unbiased reports.

To qualify as an NRTL, an organization must be independent of manufacturers, suppliers, and vendors of the products it seeks to certify. It also must be independent of employers. If complaints are brought concerning a product or if a dispute arises concerning the findings of such a complaint, an NRTL has to have procedures for resolving them. Additional procedures are required for the NRTL to identify its certified products and to ensure the proper use of its identifying mark or label on products.

An NRTL does more than just test products. One key feature distinguishes an NRTL from a "test house." An NRTL has to evaluate products during production so that they conform with test standards. In other words, an NRTL must be qualified both to test products and to certify products. An NRTL also performs initial and recurring visits to each manufacturer who uses its certification service to provide some assurance to the employer and employee that the manufacturing processes will continue to produce safe products.

After reviewing a laboratory's application and capabilities, OSHA makes a preliminary decision to grant or deny the application. This decision is published in the *Federal Register* for comment. After the comment period, the validity of any comments received is evaluated. These evaluations are used to help determine whether the applicant has met the criteria for accreditation. Upon approval, a final announcement is published in the *Federal Register* outlining the scope of the accreditation and any conditions that apply to the newly recognized NRTL.

Each accreditation is for 5 years. During that time, OSHA continually watches over the NRTL to assess its conformance with the terms of recognition. OSHA and the NRTL work together to resolve any discrepancies or problems that may occur. Unresolved issues could result in the withdrawal of NRTL status.

Currently, there are nine recognized NRTLs:

- MET Laboratories, Inc.
- Dash, Straus and Goodhue, Inc.
- ETL Testing Laboratories, Inc.
- American Gas Association Labs, Inc.
- Communication Certification Labs
- Canadian Standards Association
- United States Testing Company Inc., California Division

OSHA recognized both UL and FMRC in 1988 for 5 years ending in 1993 and is currently assessing them for continued accreditation.

Note that one of the laboratories listed, the Canadian Standards Association, is outside the United States. The NRTL program takes into account the global nature of manufacturing and certification. Foreign laboratories may apply for NRTL status, and as a prerequisite to OSHA review for accreditation, the foreign country must be open to business from U.S. laboratories.

Because product certification seems to be a growth industry throughout the world, the list of NRTLs most likely will continue to grow over time. To date, 15 additional laboratories have applied for NRTL accreditation for one or more of the appropriate test standards.

NRTL status is becoming a benchmark of excellence for U.S. testing laboratories and appears to have helped some organizations achieve international recognition, although NRTL accreditation is limited to certain test standards.

Accrediting NRTLs to perform safety testing and certification allows OSHA to govern an effort that extends far beyond its potential to provide these services singlehandedly. That is the essence of reinvention. In this instance, empowering the private sector provides an outcome in total harmony with OSHA's mission to protect workers.

For more information about the NRTL program, or if you are aware of an unsafe product within the scope of the NRTL, contact the NRTL Recognition Program, U.S. Department of Labor, Occupational Safety and Health Administration, 200 Constitution Avenue, N.W., Room N-3653, Washington, DC 20210; phone (202) 219-7193 and fax (202) 219-9068.

ATTN: Scott

Same. Difference.

When your future is riding on the timely release of a new or improved product, it's good to know you can obtain widely accepted safety listings from two independent sources.

Both ETL and UL test to the same standards

As a Nationally Recognized Testing Laboratory (NRTL), ETL can test your product to the safety standards that apply — including ANSI, IEC, UL, and others.

Both ETL and UL are accepted in the marketplace

In every jurisdiction, across the nation...the people who can influence the sale of your product know and accept the ETL label. That means code enforcement officials, specifiers, and purchasing professionals.

Both ETL and UL are international

With labs throughout the U.S. and Far East, as well as cooperative agreements with major testing bodies in the EC, Japan, and Canada, ETL can open doors for your product worldwide.

But ETL's difference is service

You'll find us refreshingly responsive, accessible, and sensitive to your needs. If your product falls short of meeting a standard, ETL will notify you quickly to avoid unnecessary delays. Once you make the necessary product changes, ETL resumes the process right where it stopped. As a world leader in performance testing, ETL can also handle your QC, R&D, and Vendor Qualification testing — a single-source capability that saves you time and money.

DATE: 4/14/99

NUMBER OF PAGES INCLUDING COVER: 8

REGARDING: Hope this is enough info. The draft inducers are ETL listed which is the same as UL listed. Following is a sheet stating they are the same. Any questions please give me a call.

BOCA®
NATIONAL BUILDING CODE/1996
PLAN REVIEW RECORD

Valuation: $4,731,000.00 Plan Review # _____

Fee: $23,680.00 Date: 6 June 98

JURISDICTION Portland Cumberland Me.
(City, County, Township, etc.)

BUILDING LOCATION Canco RD. PTLD. Me.
(Street address)

BUILDING DESCRIPTION Retirement Residence Use Group R-2 Type 5A Entire building Fully Fire Sprinklered (NFPA13)

REVIEWED BY S. Hoffses

Numerals indicated in parenthesis are applicable code sections of the 1996 *BOCA National Building Code*. The organization of this Plan Review Record follows the common Building Code format first implemented in the 1993 *BOCA National Building Code*. The plan review accomplished as indicated in this record is limited to those code sections specifically identified herein. This record references commonly applicable code sections. It does not reference all code provisions which may be applicable to specific buildings. This record is designed to be used only by those who are knowledgeable and capable of exercising competent judgement in evaluating construction documents for code compliance.

CORRECTION LIST

No.	DESCRIPTION	Code Section
1.	All Site Plan requirements must be met (completed) before a Certificate of occupancy can or will be issued –	111.0
2.	A list of Sub-contractor with address/and Telephone numbers must be submitted To me as soon as possible MR. Sam Hoffses Chief Building Inspector RM 315 @ 389 Congress ST. PTLD. Me. 04101.	
3.	Special Inspection shall be done in accordance with Chapter 17 section 1705.0 of The bldg Code	1705.
4.	ATRIUMS - In accordance with 404.0.	404.0
5.	Roof Covering - Class C roof Covering minimum - NO wood Shingles allowed.	1507 Table
6.	Structural loads as per Table 1606 (design)	1606
7.	Snow Loads - design Section 1608.0.	1608.0
8.	Wood Construction shall meet The requirements of Chapter 23.	23
9.	Wood fastening Table 2305.2	Table 2305.2

CORRECTION LIST (cont'd.)		
No.	DESCRIPTION	Code Section
10	Glass & Glazing shall be done in accordance with Chapter 24.	2404 2405 2406 2407

NOTES: N.R. — Not required
N.A. — Not applicable

ADMINISTRATION (Chapter 1)

yes — Complete construction documents *(107.5, 107.6, 107.7)*

yes — Signed/sealed construction documents *(107.7, 114.1)*

BUILDING PLANNING (Chapters 3, 4, 5, 6)

USE OR OCCUPANCY CLASSIFICATION (302.0-313.0)

✓ — Single Use Group

N/A — Specific occupancy areas *(302.1.1)*

N/A — Mixed Use Groups

N/A — Accessory areas *(302.1.2)*
Less Than 10%

GENERAL BUILDING LIMITATIONS (Chapters 5 & 6)

Apply Case 1 to determine the allowable height and area and permitted types of construction for a building containing a single use group or nonseparated mixed use groups. Apply Case 2 to determine the allowable height and area and permitted types of construction for a building containing separated mixed use groups.

AREA MODIFICATIONS TO TABLE 503

% of Allowable tabular area *(Table 503)* — 100%

% Reduction for height *(Table 506.4)* — − 20%

% Increase for open perimeter *(506.2)* — + 150 %

% Increase for automatic sprinklers *(506.3)* — + 100 %

Total percentage factor — = 330 %

Conversion factor — (330/100%) = 3.30
(Total percentage factor/100%)

Open perimeter *(506.2)*: 345' North; ~~287~~ East; 209 East; 345 South; ~~229~~ South; 147 West

Open perim. 1046 ft. Perimeter 1046 ft.

% Open perimeter = (1046/1046 = 1) x 100 = 100%
(Open perim./perim.) × 100%

% Tab. area increase = 2x(100% − 25% = 75%) = 150%
(506.2) *2×(% Open perim. -25%)*

OK ✓ CASE 1 — SINGLE USE OR NONSEPARATED MIXED USE GROUPS (313.1.1, 503.0)

Using Table 503, identify the allowable height and area of the single use group or the most restrictive of the nonseparated mixed use groups. Construction types that provide an allowable tabular area equal to or greater than the adjusted floor area and allowable heights (as modified by Section 504.0) equal to or greater than the actual building height are permitted.

Actual floor area 13,715 ft.²

Adjusted floor area* 4,156 ft.²

Actual building height 35' feet 3 stories

Allowable building height 40' feet 4 stories

*Adjusted floor area = actual floor area/conversion factor

Permitted types of construction 5B — Type of construction assumed for review (602.3) 5A
504.2

Auto. Sprinkler system increase.

N/A CASE 2 — MIXED USE SEPARATED USE GROUPS

Using Table 503, identify the allowable height and area of each of the separated use groups within the building. Construction types that provide, for each story of the building, tabular areas which result in a sum of the ratios of 1.00 or less and allowable heights (as modified by Section 504.0) equal to or greater than the actual height of the use group are permitted.

Story	Use Group	Actual floor area	Adjusted floor area*	Actual height	Allowable height (Table 503)
_____	N/A	_____ ft^2	_____ ft^2	_____ ft _____ stories	_____ ft _____ stories
_____		_____ ft^2	_____ ft^2	_____ ft _____ stories	_____ ft _____ stories
_____		_____ ft^2	_____ ft^2	_____ ft _____ stories	_____ ft _____ stories
_____		_____ ft^2	_____ ft^2	_____ ft _____ stories	_____ ft _____ stories
_____		_____ ft^2	_____ ft^2	_____ ft _____ stories	_____ ft _____ stories
_____		_____ ft^2	_____ ft^2	_____ ft _____ stories	_____ ft _____ stories
_____		_____ ft^2	_____ ft^2	_____ ft _____ stories	_____ ft _____ stories

*Adjusted floor area = actual floor area/conversion factor

$$\sum \frac{\text{Adjusted floor area}^*}{\text{Allowable area (Table 503)}} = \_\_\_\_ + \_\_\_\_ + \_\_\_\_ + \_\_\_\_ = \_\_\_\_ <= 1.00$$

Colson & Colson

GENERAL CONTRACTOR, INC.

October 14,1998

P. Samuel Hoffses
Inspector of Buildings
City of Portland
389 Congress St..
Portland ME.04101

Mr. Hoffses,

With the Ice Storm still in the memory of the people in the State of Maine. Colson & Colson feels that in the interest of the health and safety for our residences that a change in our heating system is needed.

We are looking to make the change from all electric heating in the typical units to a gas fired hydronic system with the pumps connected to our emergency generator.

Upon the completion of the design built system a set a engineered prints will be made available to the City of Portland Building Department for your review.

Thankyou

Terry Johnson
Construction Manager

CONTRACTOR'S MATERIAL & TEST CERTIFICATE FOR ABOVEGROUND PIPING

PROCEDURE

Upon completion of work, inspection and tests shall be made by the contractor's representative and witnessed by an owner's representative. All defects shall be corrected and system left in service before contractor's personnel finally leave the job.

A certificate shall be filled out and signed by both representatives. Copies shall be prepared for approving authorities, owners and contractor. It is understood the owner's representative's signature in no way prejudices any claim against contractor for faulty material, poor workmanship, or failure to comply with approving authority's requirements or local ordinances.

TEST DESCRIPTION

HYDROSTATIC: Hydrostatic tests shall be made at not less than 200 psi (13.6 bars) for two hours or 50 psi (3.4 bars) above static pressure in excess of 150 psi (10.2 bars) for two hours. Differential dry-pipe valve clappers shall be left open during test to prevent damage. All aboveground piping leakage shall be stopped,

FLUSHING: Flow the required rate until water is clear as indicated by no collection of foreign material in burlap bags at outlets such as hydrants and blow-offs. Flush at flows not less than 400 GPM (1514 L/min) for 4-inch pipe, 600 GPM (2271 L/min) for 5-inch pipe, 750 GPM (2839 L/min) for 6-inch pipe, 1000 GPM (3785 L/min) for 8-inch pipe, 1500 GPM (5678 L/min) for 10-inch pipe and 2000 GPM (7570 L/min) for 12-inch pipe. When supply cannot produce stipulated flow rates, obtain maximum available.

PNEUMATIC: Establish 40 psi (2.7 bars) air pressure and measure drop which shall not exceed 1-½ psi (0.1 bars) in 24 hours. Test pressure tanks at normal water level and air pressure and measure air pressure drop which shall not exceed 1-½ psi (0.1 bars) in 24 hours.

CONTRACTOR'S MATERIAL & TEST CERTIFICATE FOR ABOVEGROUND PIPING

PROCEDURE

Upon completion of work, inspection and tests shall be made by the contractor's representative and witnessed by an owner's representative. All defects shall be corrected and system left in service before contractor's personnel finally leave the job.

A certificate shall be filled out and signed by both representatives. Copies shall be prepared for approving authorities, owners and contractor. It is understood the owner's representative's signature in no way prejudices any claim against contractor for faulty material, poor workmanship, or failure to comply with approving authority's requirements or local ordinances.

TEST DESCRIPTION

HYDROSTATIC: Hydrostatic tests shall be made at not less than 200 psi (13.6 bars) for two hours or 50 psi (3.4 bars) above static pressure in excess of 150 psi (10.2 bars) for two hours. Differential dry-pipe valve clappers shall be left open during test to prevent damage. All aboveground piping leakage shall be stopped.
FLUSHING: Flow the required rate until water is clear as indicated by no collection of foreign material in burlap bags at outlets such as hydrants and blow-offs. Flush at flows not less than 400 GPM (1514 L/min) for 4-inch pipe, 600 GPM (2271 L/min) for 5-inch pipe, 750 GPM (2839 L/min) for 6-inch pipe, 1000 GPM (3785 L/min) for 8-inch pipe, 1500 GPM (5678 L/min) for 10-inch pipe and 2000 GPM (7570 L/min) for 12-inch pipe. When supply cannot produce stipulated flow rates, obtain maximum available.
PNEUMATIC: Establish 40 psi (2.7 bars) air pressure and measure drop which shall not exceed 1-½ psi (0.1 bars) in 24 hours. Test pressure tanks at normal water level and air pressure and measure air pressure drop which shall not exceed 1-½ psi (0.1 bars) in 24 hours.

580 WALNUT STREET • CINCINNATI, OHIO 45202 • 513-369-5000 • FAX 513-723-2740

The number of persons authorized by this power of attorney is not more than EIGHT

No. 013678

POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS: That the GREAT AMERICAN INSURANCE COMPANY, a corporation organized and existing under and by virtue of the laws of the State of Ohio, does hereby nominate, constitute and appoint the person or persons named below its true and lawful attorney-in-fact, for it and in its name, place and stead to execute in behalf of the said Company, as surety, any and all bonds, undertakings and contracts of suretyship or other written obligations in the nature thereof, provided that the liability of the said Company on any such bond, undertaking or contract of suretyship executed under this authority shall not exceed the limit stated below.

Name		Address	Limit of Power
ROBERT A. BALLIN	MARGARET HUFFMAN	ALL OF	ALL
RAY PAIEMENT	LARRY C. BUCK	EUGENE,	UNLIMITED
FRED E. CREATWOOD	STEVEN J. HANSON	OREGON	
PAT CELLERS	BEVERLEY VERBANIC		

This Power of Attorney revokes all previous powers issued in behalf of the attorney(s)-in-fact named above.

IN WITNESS WHEREOF the GREAT AMERICAN INSURANCE COMPANY has caused these presents to be signed and attested by its appropriate officers and its corporate seal hereunto affixed this 3rd day of April, 19 96

Attest GREAT AMERICAN INSURANCE COMPANY

STATE OF OHIO, COUNTY OF HAMILTON — ss.

On this 3rd day of April, 1996, before me personally appeared GARY T. DUNBAR, to me known, being duly sworn, deposes and says that he resided in Cincinnati, Ohio, that he is the President of the Bond Division of Great American Insurance Company, the Company described in and which executed the above instrument; that he knows the seal, that it was so affixed by authority of his office under the By-Laws of said Company, and that he signed his name thereto by like authority.

This Power of Attorney is granted by authority of the following resolutions adopted by the Board of Directors of Great American Insurance Company by unanimous written consent dated March 1, 1993.

RESOLVED: That the Division President, the several Division Vice Presidents and Assistant Vice Presidents, or any one of them, be and hereby is authorized, from time to time, to appoint one or more Attorneys-In-Fact to execute on behalf of the Company, as surety, any and all bonds, undertakings and contracts of suretyship, or other written obligations in the nature thereof; to prescribe their respective duties and the respective limits of their authority; and to revoke any such appointment at any time.

RESOLVED FURTHER: That the Company seal and the signature of any of the aforesaid officers and any Secretary or Assistant Secretary of the Company may be affixed by facsimile to any power of attorney or certificate of either given for the execution of any bond, undertaking, contract or suretyship, or other written obligation in the nature thereof, such signature and seal when so used being hereby adopted by the Company as the original signature of such officer and the original seal of the Company, to be valid and binding upon the Company with the same force and effect as though manually affixed.

CERTIFICATION

I, RONALD C. HAYES, Assistant Secretary of Great American Insurance Company, do hereby certify that the foregoing Power of Attorney and the Resolutions of the Board of Directors of March 1, 1993 have not been revoked and are now in full force and effect.

Signed and sealed this 14TH day of MAY, 19 98

GREAT AMERICAN INSURANCE COMPANY

CINCINNATI, OHIO

SUBDIVISION BOND

FILE

Bond No. FS2906534

KNOW ALL MEN BY THESE PRESENTS, that we COLSON & COLSON CONSTRUCTION CO.

as Principal, and the GREAT AMERICAN INSURANCE COMPANY, a corporation organized under the laws of the State of Ohio and duly authorized to transact business in the State of MAINE as Surety, are held and firmly bound unto CITY OF PORTLAND, 389 CONGRESS STREET, PORTLAND MAINE 04101 as Obligee

in the penal sum of SEVEN HUNDRED ~~FIVE THOUSAND, THREE~~ HUNDRED FORTY THREE AND NO/100 ($ 705,343.00)

DOLLARS, lawful money of the United States of America, for the payment of which well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, COLSON & COLSON CONSTRUCTION CO.

has agreed to construct in PORTLAND RETIREMENT RESIDENCE

Subdivision, in PORTLAND, MAINE

the following improvements STREET SIDEWALK, SANITARY SEWER, STORM DRAINAGE, SITE LIGHTING, EROSION CONTROL, RECREATION AND OPEN SPACE AMENITIES, AND LANDSCAPING

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH, that if the said Principal shall construct, or have constructed, the improvements herein described and shall save the Obligee harmless from any loss, cost or damage by reason of its failure to complete said work, then this obligation shall be null and void; otherwise to remain in full force and effect.

Portland Assisted Living Facility
Portland, Maine
Site Plan Approval Application

I. PROPOSAL

XL Management Company, L.L.C./Holiday Retirement Corp. proposes to develop an 80-suite assisted living facility with four cottage suites on the Phase II portion of the Woods at Canco Retirement Residence site along Canco Road.

II. REQUEST

The request is to obtain a Site Plan approval to allow the assisted living project to be developed on the site, which is zoned R-5A Residential.

III. OVERVIEW

Existing Zoning:	R-5A
Land Area:	5.0 acres
Existing Use:	Undeveloped Land
Proposed Use:	80-suite Assisted Living Facility
Proposed Parking:	48 total spaces consisting of 46 open, 2 handicap accessible

IV. CONCEPT

The Assisted Living Facility is an 80-suite facility for seniors who do not require the specialized services of a nursing home, yet are in need of some assistance with their daily routine. Services and activities at the facility are provided to maintain or improve the capabilities of each resident, with an emphasis on abilities rather than disabilities.

Services include three prepared meals daily, housekeeping, laundering, and private bus transportation. The monthly rent payment covers the private room, the afore-mentioned services and utilities. In addition to these services, a Service Plan detailing the services a resident requests or requires is determined. These services include assistance with medications, bathing, grooming, dressing and other areas of need. These services are offered 24 hours a day.

Private rooms afford the advantages of independent living while the services included provide support, security and friendship. The private suites include

2601 – 25th St. SE, Suite 300 ▪▪ Salem, Oregon 97302 ▪▪ Phone 503.399-1090 ▪▪ Fax 503.399-0565

studio, one and two bedroom versions. Each is similar to a dwelling unit except a kitchen is not included.

Typically our resident will be a single person in their late 70's or 80's. Approximately 10% of the rooms will be rented by couples making a total building population of 95. Fewer than 5% of the residents will be driving their own cars.

The site is ideally suited for our senior housing use. The site is in close proximity to services such as shopping, recreation and medical needs while still being part of an established residential area.

This proposal would offer several benefits to the area, which include:

- Large open spaces and generous setbacks. Over 60% of the site will be landscaped open space providing large open spaces and ample setbacks to create a park-like setting, and help buffer neighboring properties.

- Quiet Senior Residential Use – The proposed assisted living facility has 80 suites and four cottage units, which include studios, one bedroom, and two bedroom types. The suites do not have kitchens and are not considered full dwelling units. They are different from conventional senior apartment units with full kitchens, in that the density effect would be negligible. In addition, only about 10 percent of the suites will be occupied by couples, keeping the overall building population low. This project will not create the problems typically associated with higher density developments, such as traffic, noise or increased demand on public services.

- Low Traffic Generation – Residents, since they are in need of assistance, will seldom drive. We expect less than two trips per day per suite for visitor and staff purposes, but without the peak hour trip generation. This is based on the Institute of Transportation Engineers report and is far below equivalent trips per unit for a multi-family project.

- Increases Local Tax Base – This project is privately funded with no publicly funded assistance.

- Low Impact on Public Services - Including parks, schools, libraries, and transportation system.

- Fulfills Need for Assisted Living Housing - Our research has found that there is a strong need for the XL/Holiday program in this area.

V. STAFFING PLAN

The facility will employ approximately 32 full-time equivalent positions, which include administrative, food services, housekeeping and maintenance, and health care staff. The facility will maintain a health services staff on duty 24-hours a day.

VI. TRAFFIC/PARKING

Residents, since they are in need of assistance, typically do not drive. One parking space per two suites is sufficient for visitor and staff parking. Since residents do not drive, we expect less than two trips per day per suite for visitor and staff purposes. This is based on the Institute of Transportation Engineers informational report and is far below equivalent trips per unit for a multifamily project. Enclosed is a study of traffic and parking implications for Assisted Living Residences conducted by the American Seniors Housing Association. This study explains in detail the traffic and parking generation a project like ours will produce.

CONCLUSION

In conclusion, we feel that this site is ideally suited for our use and would be a nice addition to the Canco Road area and the existing Retirement Residence development
