Conditions:				
1) Hardwired photoelectric interconnected battery backup smoke detectors shall be installed in all sleeping rooms, protecting outside these rooms, and on every level.				
The same is required for existing buildings, where permanent wiring is feasible; or at the very least battery operated smoke detectors are required. Verification of this will be upon inspection.				
2) Separate permits are required for any electrical, plumbing, sprinkler, fire alarm, HVAC systems, heating appliances, including pellet/wood stoves, commercial hood exhaust systems, fire suppression and fuel tanks. Separate plans may need to be submitted for approval as a part of this process.				
3) Where supported by attachment to an exterior wall, decks shall be positively anchored to the primary structure and designed for both vertical and lateral loads as applicable. Such attachment shall not be accomplished by the use of toenails or nails subject to withdrawal. See IRC 2009 Sec. 502.2.2 and IBC Sec. 1604.8.3 for details.				
Deck lateral load connection shall be allowed with hold-down tension devices installed in not less than two locations per deck, with each device having an allowable stress design capacity of not less than 1500 pounds.				
Where positive connection to the primary building structure cannot be verified during inspection, decks shall be self- supporting.				
.				
4) Beams & girders shall be solid or built up and bear on wood or supported by approved anchors per IBC Sec. 2308.7 and IRC R502.6				
5) Carbon Monoxide (CO) alarms shall be installed in each area within or giving access to sleeping rooms. That detection must be powered by the electrical service (plug-in or hardwired) in the building and battery.				
6) This permit is approved based upon information provided by the applicant or design professional. Any deviation from the final approved plans requires separate review and approval prior to work.
