## Commercial Awnings

### How to Measure for Waterfall Awnings with Vertical Face

#### Step 1

Mark up 7' 0" from sidewalk or ground on building. Your city code may require a higher minimum height/.

#### Step 2

From the 7' mark, or as required, measure up the side of the building (from 1 to 2) to where you want the awning to stop at the top. This is your drop. You can go up as high as you would like remembering that you must maintain a flat plain. We can make off sets, call one of our Awning Specialist for help.

#### Step 3

Your our projection (from 3 to 4) can be any length up to 1 1/2 times your drop.

#### Step 4

Measure the width (from 5 to 6) of your awning.

\*\* Note (April 2000):  
 The NFPA 701 - 1999 Edition supersedes the NFPA 701 - 1996 Edition.

The step-by-step test implementation and test failure criteria are the same for both the 1996 Edition and the 1999 Edition.

Therefore, it is assumed that this 1999 Edition test report will also satisfy any building code which cites the 1996 Edition.
