

Project Description

Building Permit Application

37 Murray Street

Tim and Sarah Johnston

37 Murray Street is a residential property to which we intend to make some renovations. We will expand the full bathroom on the second floor, which includes constructing one new wall, moving the bathtub about 2 feet, moving the toilet to the other side of the room, and installing a double sink vanity. On the first floor, we will also install a small half bathroom, which includes constructing two new small walls in an area adjacent to the kitchen. In addition to the bathroom projects, we will remove a structural wall with two built-in cabinets, which will be replaced with a structural beam and a peninsula island between the kitchen and the dining room. We will continue to use 37 Murray Street as a residential single-family home, as it has previously been used.
