Our tent is 40x60. I just spoke to One Stop to clarify - apparently, they bring the 40x40 one and then add the 2-40x10s on site, so that's the reason for the two certs. She said this is how they have always done this? This is our first year using them for the tent.

We are using just the one large tent - however when I asked One Stop for the flame cert, they provided both of these and told me that you'd need both?

Jen, you also show on your plot plan only 1 large tent, but you sent the flame certs for 2 different tent sizes? How many tents over 10x10 are you using?
