

## **20. Solid Waste**

All residential and office waste will be stored in appropriate trash/recycling containers internally in a trash rooms located within each building. These containers will be serviced by an independent solid waste contractor, on a regular basis. It will be the job of the building maintenance to move the trash/recycling receptacles out for the independent contractor.

All waste generated from the site preparation and general site work will be collected and sorted/separated on-site and disposed of properly, off-site, by a private contractor.

All construction waste will be collected and sorted/separated on-site in containers and managed by the general contractor.
