

On December 7th I Inspected Location 592 Washington Ave Portland Me 04103
the Home of Haendel & Isely Lamour.

There has been much new Electrical Work done by the owner that the Code Enforcement has seen & Portland Fire Department.

Myself & the Owner Haendel Lamour have looked at and all the New work that he has done that is visible or with in site.
All meets NEC code and all over current circuit breakers have been matched to the correct code requirement. Mr Lamour has
installed Hard wire smokes detectors in all bedrooms they are not Interconnected as it is a old existing building.

I did find extension cords being used and Kitchen appliances using them he has removed all extension cords and now knows they
are not to be used as a regular outlet.

I can say at the time I had made the Inspection the electrical that is old and new is safe and meets code. This does not cover
after the date of inspection.
