APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

PERMIT ISSUED

OCT 6 1953

CITY of PORTLAND

Portland, Maine, October 6, 1953

To the INSPECTOR OF BUILDINGS, PORTLAND, MAINE

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location: 42 Alton Street Use of Building: Dwelling No. Stories: Existing: New Building Existing:
Name and address of owner of appliance: Charles Roy, 12 Alton St.
Installer's name and address: H. F. Bent Mfg. Co., Cochran, Maine Telephone:

General Description of Work

To install forced warm air heat and oil burning equipment in place of existing gas-fired warm air heat

IF HEATER, OR POWER BOILER:

Location of appliance: basement Any burnable material in floor surface or beneath? no
If so, how protected? Kind of fuel? oil
Minimum distance to burnable material, from top of appliance or casing top of furnace: 5" with shield
From top of smoke pipe: 12" From front of appliance: Over 4" From sides or back of appliance: Over 3"
Size of chimney flue: 6-12 Other connections to same flue: none
If gas fired, how vented? Rated maximum demand per hour:
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion? yes

IF OIL BURNER

Name and type of burner: Home Art (dalco) Labelled by underwriter's laboratories? yes
Will operator be always in attendance? Does oil supply line feed from top or bottom of tank? bottom
Type of floor beneath burner: concrete
Location of oil storage: basement Number and capacity of tanks: 1-275 gal.
If two 275-gallon tanks, will three-way valve be provided?
Will all tanks be more than five feet from any flame? YES How many tanks fire proofed?
Total capacity of any existing storage tanks for furnace burners: none

IF COOKING APPLIANCE

Location of appliance: Any burnable material in floor surface or beneath?
If so, how protected? Kind of fuel?
Minimum distance to wood or combustible material from top of appliance:
From front of appliance: From sides and back: From top of smokepipe:
Size of chimney flue: Other connections to same flue:
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour:

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

12" vent

Amount of fee enclosed? 2.00 (\$2.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)

APPROVED: [Signature] 10.6.53

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed? yes

N-ESS

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 42 Alton St. Use of Building Dwelling No. Stories 1 New Building Existing
Name and address of owner of appliance Portland Const. Co. 234 Middle St. City
Inst. name and address Portland Gas & Co. 5 Temple St. City Telephone 2-8321

General Description of Work

To install Gas fired forced warm air furnace.

IF HEATER, OR POWER BOILER

Location of appliance or source of heat Basement Type of floor beneath appliance Concrete
If wood, how protected? Kind of fuel Gas
Minimum distance to wood or combustible material, from top of appliance or casing top of furnace 18"
From top of smoke pipe 15" From front of appliance 4' From sides or back of appliance 4'
Size of chimney flue 8" X 12" Other connections to same flue none
If gas fired, how vented? To chimney Rated maximum demand per hour

IF OIL BURNER

Name and type of burner Labelled by underwriter's laboratories?
Will operator be always in attendance? Does oil supply line feed from top or bottom of tank?
Type of floor beneath burner
Location of oil storage Number and capacity of tanks
If two 275-gallon tanks, will three-way valve be provided?

E. S. Smith
Inspector

Inspector of Buildings

Notice: This certificate identifies lawful use of building or premises, and ought to be transferred from owner to owner when property changes hands. Copy will be furnished to owner or lessee for one dollar.

WARNING !!!

THIS BUILDING PERMIT IS ISSUED
SUBJECT TO SPECIAL CONDITION:

THAT NO CONCRETE SHALL BE POURED IN FOUNDATION FORMS AND NO
LAYING OF UNIT MASONRY IN FOUNDATION WALLS SHALL BE STARTED UNTIL
NOTICE HAS BEEN GIVEN AT THE DEPARTMENT OF BUILDING INSPECTION OF
READINESS TO START ACTUAL MASONRY WORK, AND UNTIL RE-CHECK OF
LOCATION HAS BEEN MADE BY INSPECTOR.

* * *

Original markings of corners of lot and especially stakes on
street line set by Dept. of Public Works must be kept intact and
easily accessible for re-check--not covered by excavated earth
or building materials. Otherwise the "go-ahead" cannot be given.
Dept. of Public Works cannot re-set their stakes.

* * *

Obviously the notice for re-check must be given at such a time
as to allow reasonable opportunity to make re-check.

COMPLAINT _____

MR. -

Carl has checked this and says ~~foundations~~ foundation is to be built on original soil which is hard blue clay similar to that on which houses on other side of street were built. afj

Memorandum from Department of Building Inspection, Portland, Maine

42-44 Alton Street—Permit for construction of dwelling 31' x 29' for
Portland Construction Co.--4/3/50

Our inspector reports that you have excavated for the proposed dwelling at the above site; that you have found that all of the foundation soil will bear on the original soil instead of on fill as first supposed; and that you believe that this soil will adequately support the building without undue or unequal settlement.

On this basis, as far as this dwelling is concerned, the directions about capacity of the soil in my former letter may be ignored.

The general construction permit is enclosed. Please observe the requirement of notice to this office and check of forms location before anything at all is put in the forms.

Inspector of Buildings

AF 42-50 Alton Street-I

March 29, 1950

Mr. Clifford L. Swan
234 Middle Street
Portland, Maine

Subject: Soil conditions on lots at 42-50 Alton Street
where construction of two new dwellings is proposed

Dear Mr. Swan:

Since it is likely that you have an interest in the construction by the Portland Construction Company of the proposed dwellings at the above location, we wish to acquaint you with the problems involved in relation to the soil conditions there. We are issuing permits for excavation only for these buildings with the request that design data for foundations be furnished before the general construction permits covering the rest of the work are issued.

The matter of soil bearing conditions is one which has received too little consideration in most cases in the construction of buildings in Portland in the past. In the case of dwelling houses the loads involved are usually of so light a nature that under ordinary circumstances there is no need to pay particular attention to the bearing quality of the soil. However, our inspector reports that conditions are such on these two lots that it is likely that the buildings will rest partly on the original soil and partly on fill of very poor quality besides being close to tidal waters which may or may not affect the adequacy of the bearing furnished by the soil. Under such circumstances of unequal soil bearing conditions it becomes extremely important to design the foundations in such a manner as to prevent unequal settlement of different parts of the buildings, thus causing cracking and distortion to occur.

Therefore in your interest and that of the people who will eventually own the buildings, we deem it our duty to make certain that adequate measures are to be taken to insure proper construction before the general construction permits for the buildings are issued. Because actual soil conditions cannot be determined until after excavation has been made, we are issuing advance permits limiting all work to the excavation. As soon as this has been made, someone who is capable of passing upon the adequacy of the soil conditions should be secured to design the foundations needed to handle the situation.

Very truly yours,

Warren McDonald
Inspector of Buildings

AP 42-44 Alton Street-I
AP 46-50 Alton Street-I

March 19, 1936

Portland Construction Company
Attn: Mr. Shirley B. Higgins
23 1/2 Main Street
Portland, Maine

Subject: Permits for excavation only
For two dwellings at 42-44 and 46-50
Alton Street

Gentlemen:

The permits issued herewith are to cover only the excavation for the foundations of these buildings. Due to the apparent poor soil conditions at these locations it is necessary that after the excavation has been carried to the desired depth and the soil on which the foundations are to rest has been exposed, expert opinion be secured and tests made if necessary to determine the carrying capacity of the soil.

While loads placed upon the soil by the ordinary dwelling are comparatively light, the probability that the foundations for these buildings may rest partly on original soil and partly on fill of an inferior nature and the close proximity to tidal waters makes it necessary that care be taken in the design of the foundations to provide construction adequate to prevent unequal settlement. For this reason it is necessary that you have someone who is capable of so doing design adequate foundations for these buildings, such design data to be filed at this office before the general construction permits may be issued and any work on forms may be started.

Very truly yours,

Warren McDermid
Inspector of Buildings

BUILDING PERMIT REPORT

DATE: 8/AUG/96 ADDRESS: 42 ALTON ST.

REASON FOR PERMIT: TO CONSTRUCT DECK 10'X14'

BUILDING OWNER: ALVIN WOOLLEN / CUTTING EDGE

CONTRACTOR: Lily G. Townsend APPROVED: *1

PERMIT APPLICANT: _____ DENIED: _____

CONDITION OF APPROVAL OR DENIAL

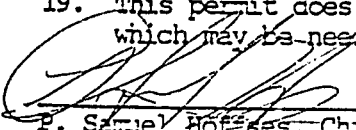

1. Before concrete for foundation is placed, approvals from the Development-Review-Coordinator-and-Inspection Services must be obtained. (A 24 hour notice is required prior to inspection)
2. Precaution must be taken to protect concrete from freezing.
3. It is strongly recommended that a registered land surveyor check all foundation forms before concrete is placed. This is done to verify that the proper setbacks are maintained.
4. All vertical openings shall be enclosed with construction having a fire rating of at least one(1) hour, including fire doors with selfclosers.
5. Each apartment shall have access to two(2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.

6. The boiler shall be protected by enclosing with one(1) hour fire-rated construction including fire doors and ceiling, or by providing automatic extinguishment. Sprinkler piping serving not more than six sprinklers may be connected to a domestic water supply having a capacity sufficient to provide 0.15 gallons per minute, per square foot of floor throughout the entire area. An INDICATING shut-off valve shall be installed in an accessible location between the sprinkler and the connection to the domestic water supply. Minimum pipe size shall be 3/4 inch copper or 1 inch steel. Maximum coverage area of a residential sprinkler is 144 sq. feet per sprinkler.
7. Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside without the use of special knowledge or separate tools. Where windows are provided as means of egress or rescue, they shall have a sill height not more than 44 inches (1118mm) above the floor. All egress or rescue windows from sleeping rooms shall have a minimum net clear opening height dimension of 24 inches (610mm). The minimum net clear opening width dimension shall be 20 inches (508 mm), and a minimum net clear opening of 5.7 sq. feet.
8. A portable fire extinguisher shall be located as per NFPA #10. They shall bear the label of an approved agency and be of an approved type.
9. All single and multiple station smoke detectors shall be of an approved type and shall be installed in accordance with the provisions of the City's building code Chapter 9, section 19, 919.3.2(BOCA National Building Code/1993), and NFPA 101 Chapter 18 & 19. (Smoke detectors shall be installed and maintained at the following locations):

1. In the immediate vicinity of bedrooms
2. In all bedrooms
3. In each story within a dwelling unit, including basements

In addition to the required AC primary power source, required smoke detectors in occupancies in Use Groups R-2, R-3 and I-1 shall receive power from a battery when the AC primary power source is interrupted.

10. Private garages located beneath habitable rooms in occupancies in Use Group R-1, R-2, R-3 or I-1 shall be separated from adjacent interior spaces by fire partitions and floor/ceiling assembly which are constructed with not less than 1-hour fire resisting rating. Private garages attached side-by-side to rooms in the above occupancies shall be completely separated from the interior spaces and the attic area by means of 1/2 inch gypsum board or the equivalent applied to the garage side. (Chapter 4 section 407.0 of the BOCA/1993)
- * 11. Guardrail & Handrails-A guardrail system is a system of building components located near the open sides of elevated walking surfaces for the purpose of minimizing the possibility of an accidental fall from the walking surface to the lower level. Minimum height all Use Groups 42", except Use Group R which is 36". In occupancies in Use Group A, B, H-4, I-1, I-2 M and R and public garages and open parking structures, open guards shall have balusters or be of solid material such that a sphere with a diameter of 4" cannot pass through any opening. Guards shall not have an ornamental pattern that would provide a ladder effect.
12. All exit signs, lights, and means of egress lighting shall be done in accordance with Chapter 10, section & subsections 1023. & 1024. of the City's building code. (The BOCA National Building Code/1993) 10"
- * 13. Stair construction in Use Group R-3 & R-4 is a minimum of 9" tread and ~~8 1/4"~~ ^{8 3/4"} maximum rise. All other Use Group minimum 11" tread, 7" maximum rise.
14. Headroom in habitable space is a minimum of 7'6".
15. The minimum headroom in all parts of a stairway shall not be less than 80 inches.
16. All construction and demolition debris must be disposed at the City's authorized reclamation site. The fee rate is attached. Proof of such disposal must be furnished to the office of Inspection Services before final Certificate of Occupancy is issued or demolition permit is granted.
17. Section 25-135 of the Municipal Code for the City of Portland states, "No person or utility shall be granted a permit to excavate or open any street or sidewalk from the time of November 15 of each year to April 15 of the following year".
18. The builder of a facility to which Section 4594-C of the Maine State Human Rights Act, Title 5 MRSA refers, shall obtain a certification from a design professional that the plans of the facility meet the standards of construction required by this section. Prior to commencing construction of the facility, the builder shall submit the certification to the Division of Inspection Services.
19. This permit does not excuse the applicant from obtaining any license which may be needed from the City Clerk's Office.

P. Samuel Hoffes, Chief of Inspection Services
