Memorandum from Department of Building Inspection, Portland, Maine

Oct. 16, 1957

To Commissioner of Public Works
From Inspector of Buildings.

Subject: Moving building from #130 Auburn St. to #850 Washington Ave.

We have application for permit to move 2-car frame garage as above.

We are checking the proposition against Zoning Ordinance and Building Code and will delay issuance of the permit until we hear from you that the permit for moving through the streets is cleared sufficiently. When that point is reached, will you be kind enough to write "OK to issue building permit" on the bottom of this memorandum and return.

Warren McDonald
Inspector of Buildings. *by S. M.*

RECEIVED
APR 12 1948
DEPT. OF B.D.C. INSP.
CITY OF PORTLAND

AP 85C Washington Ave.-1

April 14, 1943

Mr. Munson I. Strout
Co. Gray, Maine

Subject: Permit for repair after
fire and rebuilding of 2-story
piazza at 850 Washington Ave.

Dear Sir:

Although the plan filed with your application fails to show clearly just what is proposed, we are issuing the permit based on the following:

1. The fact that cedar posts are being used for a foundation will prevent issuance of a permit for a roof over the piazza at a later date, if one is desired, without changing the foundations to concrete piers.

2. Nothing is shown as to the manner in which the 2x3 floor joists are to be supported on the 4x4 sill and the member carrying second floor. These must be supported on top of the carrying timbers or notched over a 2x3 nailing strip nailed to the side of them.

3. The sills at the first floor level must extend all around the outer edges of the piazza and must be all one piece in cross section, not built up of two pieces.

4. Doubled headers and trimmers are required where opening in second floor framing occurs in the piazza. All parts of the piazza and stairs and platform leading to it are required to have foundations below frost, -4' below grade.

Very truly yours,

Inspector of Buildings

AJS/S

CC: Mr. Samuel Goodey
856 Washington Avenue

It is recommended that you use concrete piers and corner and intermediate posts no less than 4x6 now, so that no great

Munson I. Strout --- 2.

April 14, 1943

change will be necessary if the owner desires later to add a roof or make piazza higher. Concrete piers should be no less than 8 inches square at surface of ground, no less than 10 inches square at bottom of pier, should extend at least 6 inches above the ground as well as 4 feet below and woodwork bearing on piers should be anchored to the piers by metal dowels cast into the concrete or otherwise.
