More Headroom. Stronger Roof Design.

- Gambrel style building gives more headroom and cubic storage space. Starting with high grade steel, every frame pipe and connector going through a proprietary 13 step Rhino Shield surface preparation process.
- Heavy duty 2" diameter all steel frame, bonded with Dupont™ baked on thermoset powder coat that prevents chipping, peeling, rust, and corrosion.
- Solid 8 rib design, complete with slip fit connectors and swedged tubing for easy assembly and bolt hardware at every connection point ensures a solid structure. Rugged Ratchet Tite™ tensioning for quick and easy cover installation.
- UV-treated inside and out with added fade blockers, anti-aging, and anti-fungal agents resulting in a fabric cover that withstands the elements.
- Structure sets up quickly and in most cases requires no building permits. Check local ordinance before installation.
