Brad,
this plan should be attached to the permit before issuing. It does not change my approval with conditions. So this could be issued. It does not need historic review.
thank you for asking, Good call
Marge

Marge, here are the plans for the skylights already set up in the original permit application you approved. Currently the project has been fast tracked but not issued. Does this need to be reviewed? I have put the permit on Hold until I hear from you.
