AP Hedden Street-I
(Assessor's Lot No. 172-D-3)

September 27, 1951

Mr. Hiram S. Stults
R. F. D. #5
Portland, Maine

Copy to: Mr. William Alexander
33 Pitt Street

Dear Mr. Stults:

Building permit for construction of a one family dwelling and attached garage on Hedden Street (Assessor's Lot No. 172-D-3) is issued herewith based on the plans filed with the application and subject to certain details being cared for as discussed with you, as follows:

1. A 4x8 Douglas Fir beam is to be provided over the door opening in the front wall of the garage. Ceiling timbers over the garage are to run the 11' way and steps are to be taken to provide adequate living action for the front wall since these joists are to run parallel to it.
2. Fire Protection by means of plaster or perforated gypsum lath is to be applied to the ceiling of garage and the garage side of the partitions between the garage and living quarters. A Class "C" labelled fire door equipped with a suitable self-closing device is to be installed in the opening leading from the garage to the living quarters. Unless floor of garage is to be at least 6" lower than the floor of that section of the dwelling into which the door opens, a raised threshold at least 6" high is to be provided in this doorway.
3. Headers over the picture window opening in the front wall of living room and over the mullion window opening in the side wall of the front bedroom are to be 4x10 Douglas Fir.
4. The roof of the small gable on the front of the building is to be framed on top of the rafters of the roof over the main building, which in turn are to be carried on a 4x10 Douglas Fir beam extending across the ceiling of the front bedroom in line with the front wall of the main house. Ends of ceiling timbers of the main building are to be supported on this beam.
5. It is not clear whether any sort of a platform and steps are to be provided outside the Dutch door in the rear wall of the dining room. If one is to be provided, foundations extending at least four feet below grade are required with the usual construction of 4x6 sills around the three outer edges of the platform provided and the floor timbers supported either on top of the sills or notched over 2x3 nailing strips spiked to the sides of the sills in the case of a wooden platform.

Very truly yours,

Warron McDonald
Inspector of Buildings

/G

5P Redlon Street-1
(Assessors Lot No. 178-D-3)

September 20, 1951

Mr. Hiram S. Stults
R. F. D. 45
Portland, Maine

Copy to: Mr. William Alexander
33 Pitt Street

Dear Mr. Stults:

There are a number of details concerning the construction of the proposed dwelling and attached garage on Redlon Street (Assessors Lot No. 178-D-3) about which more information is needed before a permit may be issued. These are as follows:

1. What size header is to be provided over the door opening in the front wall of the garage? *4x8 D.P.*
2. In what direction are the ceiling timbers over the garage to run? *- 11' way 2x8-16' oc.*
3. What type of fire door is to be provided over the opening from the garage to the dwelling? *Class C Labelled fire door*
4. What is size of header over the picture window in the front wall of living room to be? Are there to be studs between each unit of the various double mullion windows? If not, what size headers are to be provided over these openings?
5. Are valley rafters to be provided where the small front gables join the roof of main building or are the rafters of the gable to be supported on top of the rafters of the main roof? If the latter condition is to prevail, what is to be provided for support of the lower end of the rafters of the main roof across the front bedroom? *4x10 header across bedroom*
6. In what direction are the ceiling timbers over the bathroom and front bedroom area to run? *- 0/1*

Very truly yours,

Warren McDonald
Inspector of Buildings

AJS/G
