Conditions:				
<ol style="list-style-type: none"> 1) Hardwired photoelectric interconnected battery backup smoke detectors shall be installed in all bedrooms, protecting the bedrooms, and on every level. The same is required for existing buildings, where permanent wiring is feasible; or at the very least battery operated smoke detectors are required. Verification of this will be upon inspection. 2) Separate permits are required for any electrical, plumbing, sprinkler, fire alarm, HVAC systems, heating appliances, including pellet/wood stoves, commercial hood exhaust systems and fuel tanks. Separate plans may need to be submitted for approval as a part of this process. 3) Any modifications to existing building systems and all new systems (HVAC, electrical and service water heating) shall meet IECC 2009 or ASHRAE 90.1-2007 requirements for energy code compliance. 4) If there are 4 or more risers, a handrail is required on one side of stairs with ends returned if the guardrail does not meet graspability dimensions. A 2x4 is not considered graspable. One handrail is required on ramps exceed a pitch of 12:1. 5) This permit is issued based on the plans submitted. Variations in actual construction that effect grades may change the requirements for handrails and guards. 6) Carbon Monoxide (CO) alarms shall be installed in each area within or giving access to bedrooms. That detection must be powered by the electrical service (plug-in or hardwired) in the building and battery. 7) This permit is approved based upon information provided by the applicant or design professional. Any deviation from the final approved plans requires separate review and approval prior to work.
