Subject: RE: SFMO approval for 216 Ludlow St, Portland Maine daycare inspection.
Attachments: M Ligotti.pdf

Hi all,

Here is the electronic version of the passed fire inspection that is electronically submitted to our division from the State Fire Marshal's Office. Typically passed indicates there were no plan of correction items identified and the provider was in compliance with life safety codes. Please let me know if additional information is necessary.

Thanks

Katie

Hi there Inspector Peaslee,

I'm not sure if you recall, but you completed a State Fire Marshall's inspection for a home daycare for me at 216 Ludlow Street in Portland, on Monday, January 26, a few weeks back before our first big storm. Thank you!

I know your paperwork & approval were submitted, as the City of Portland pushed through my City Fire Marshall and Building Code inspections, which I had on Tuesday this week. They have asked for a copy of the SFMO approval to complete their paperwork to proceed for the Change of Use through the City of Portland. Is there a copy of anything you'd be able to email me a PDF of to send to them?

After speaking with Norm (the State Fire Marshall administor) yesterday, I'm understanding your paperwork goes straight to DHHS, electronically--he stated that there is nothing other than my license to be issued for the record. I'm hoping there is some written correspondence I can offer the City so that they may satisfy their paperwork.

I am in a bit of a predicament because all these moving pieces are interconnected and the license being issued is also waiting for the City paperwork and approval of the Change of Use.

I'll look forward to hearing back from you at your earliest convenience, and have cc'd the DHHS case manager, Katie Danaher; Portland Fire Marshall, Cap't David Petruccelli; and the City of Portland Building Inspector, George Froehlich in this correspondence.

Thank you kindly for your time regarding this matter.

Sincerely,
Margaret LR Ligotti
