Hello Chris, I am in the process of reviewing this project for building code ...

**Chris Chase**

to me, ethanlav

Ethan,

I do not do permits or the construction side of this project. We only raise and excavate and hire out the foundation. You should t the foundation the footings will be 8" thick and 16" wide with two rows of re-bar 4' plus in depth, foundation will be 8' tall and 8" center lally columns will be 3.5" set on footing and spaced no more then 8' apart, basement floor 4" thick, all foam insulation ne under the cement floor I would go with a vapor barrier only and no insulation I seen too many floors brake up after only a few ye

Hope this helps

THANK YOU

Chris Chase
