Tim - Bartlett Tree Experts

The tree shown in the photos should be removed.
Since it seems the tree is greater than 75' from the brook it is outside the protection area but we would likely ok due to the risk involved. Also, send back the address.

Thanks

Jeff Tarling

Jeff,

It was good to see you yesterday. Attached are 2 pictures of the willow tree that we plan to take down. One of the pictures shows the trampoline that was damaged by a fallen limb. I did bring along a 100 foot tape measure and found that the Willow tree is about 88 feet from the creek. Please let me know if you need to look at the tree or not. We are planning to take the trees down sometime the latter part of next week.

On another note, here are our emergency contact numbers:

Tim's cell and home phone
329-5405
885-0233

Office number's
883-3340
885-0794
