

To whom it may concern:

This statement is meant to accompany the building permit application I filed on 12-5-13. On the proposed first floor plan permit, I included an exterior door and stairwell leading from the first floor to the back yard of the building. I am no longer planning to make this addition, and formally request that both the door and stairs be removed from the list of items on my renovation.

Please let me know if there are any concerns or questions.

Thank you.
