

FUJITSU

Wall Mounted High-SEER 9, 12 and 15,000 BTU Systems

Systems 9RLS3, 12RLS3, 15RLS3

Up to 33.0 SEER

Indoor Models
ASU9RLS3
ASU12RLS3
ASU15RLS3

Outdoor Models
AOU9RLS3
AOU12RLS3
AOU15RLS3

Energy Efficient

	9RLS3	12RLS3	15RLS3
SEER	33.0	29.3	25.3
EER	18.0	15.2	13.9
HSPF	14.2	14.0	13.4

World's Most Efficient Heat Pump

All systems feature high efficiencies and are **ENERGY STAR® Most Efficient 2015 Qualified**, meaning lower utility bills for home and business owners.

Rebates

To encourage customers to buy energy efficient products, many states and/or local utility companies offer significant rebates for the purchase of a ductless mini-split system. Go to Fujitsu's web site to search for local rebates, consumer loans and utility bill discounts. We provide a listing of rebates and offerings on qualifying Fujitsu mini-splits by state. www.fujitsugeneral.com/utility_rebates.htm

ESP Energy Saving Program

ESP knows how to save you money even when you forget. If you leave the room without turning the unit off, ESP knows that you left and 20 minutes later, set temperature is increased by 4°F when cooling and reduced by 8°F when heating. When you come back to the room, it returns to previous operating mode. This prevents wasteful operation to save energy without you having to think about it.

Power Diffuser

A power diffuser operates automatically in either heating or cooling mode to optimally control the airflow. A comfortable space is quickly achieved.

Cooling

During cooling mode, far reaching horizontal airflow quickly creates a comfortable space throughout the entire room.

Heating

During heating mode, vertical airflow provides comfortable floor level heating.
