NOT COMPLETE

Pipe runs up thru side wall - line it almost flush with front
of building. This is similar to a others in the City. Cannot
cross this up, because it would give the impression that
we had cut this - method. So will mark it, not
completed. RW

and Fill

Memorandum from Department of Building Inspection, Portland, Maine

179 Middle Street--Installation of oil burning equipment for Charles Rosenbloom by
Pallotta Oil Company, September 17, 1949.

Paras. as issued subject to the following:

Question has been raised with Mr. Thurlow as to arrangements for fill pipe and vent pipe at the front of the building, in view of the fact that the building sets very close to or on the street line.

If there is any problem as to possible encroachment upon the public sidewalk, installer should refrain from starting that part of the installation and furnish full details as to what he proposes and get approval before going ahead with that part of the work.

This department has no right to authorize encroachment on the public sidewalk of the kind the fill pipe and the vent pipe would be, as granting that type of encroachment lies only within the province of the Municipal Officers.

There is also the question of running the hose from tank truck to fill pipe across the public sidewalk. When that operation is necessary in the business district, it has become customary to secure the approval of the Chief of Police as to times when the filling operation shall take place.

CC: Mr. Charles Rosenbloom
