Attachments: Permit Authorization Affidavit Final.pdf

Here is a fast track application. This is a program, provided in addition to your original permit application that your project may be eligible for. There is no charge for this, however it does need to be READ and filled out in its entirety, and then BOTH PAGES need to be sent back. Typically a fast-track able permit takes @5-10 business days as opposed to the typical ones that go through the complete review process, which can take up to 20-30 business days. This document is also available on line:

<http://www.portlandmaine.gov/planning/fasttrackaffidavit.pdf>

Please get this back ASAP (if interested) so it can be entered into our system with the other documents.

FYI; I had a plan reviewer look at the plan, and she stated this could be considered a fast track permit.

Good Morning,

Attached please find a building permit request and attached plot plan and proposed structure at my home on Wolcott Street.

Keith Samara- Sempre Fi Contracting - is the contractor and said he could be called if there are any questions. On the building permit specifically there are zero C of O fees and zero Historical Rev fees. Total cost is \$12,500. (I was unable to tab into those sections after repeated tries.)

Thank you. I look forward to hearing from you.

Keith hopes for an October 28 start date.

Sincerely,

Sheila Jepson
