RE: 1510 Congress St. (196 D011)

Dear Licensed Plumber,

This office has received written documentation from the Portland Water District that the static pressure of the water service for the above structure is 99 psi. Attached is a copy of the plumbing permit obtained by you for the internal plumbing for the above structure and Section 11 G.2. of the State Plumbing Code. Also included are Sections 1.P & 1.Q of the Code.

The installation of the potable water system at the above location was completed without an approved regulator proceeded by an adequate strainer as required by Section 11.G.2. This is required when the pressure exceeds 80 psi. This is a violation of the State Plumbing Code. This is a notice of violation pursuant to the Code. This violation must be corrected by 12/28/01. Compliance is required at this time. Failure to comply will cause this office to seek relief through the legal system, including potential injunctive relief with civil penalties.

This constitutes an appealable decision pursuant to Section 1.D of the Code. Please feel free to contact me if you wish to discuss the matter.

Sincerely,

Mike Nugent LPI#0640
Manager of Inspection Services
