Jeanie,

Good afternoon. Pleasure talking with you earlier. Please see the attached stamped pages of the construction drawing that are named the same as my previous submission so they should overwrite anything you currently have on file. As for the anchor plates, the supplier stated there will be four (4) plates to secure the structure to the grade beams. The last question was about the actual shelter and how it was connected. Please see the two (2) pictures attached to give you an idea of what they would look like. This installation would be a brick print instead of the tan. If you have any further questions please feel free to reach out. I appreciate your assistance on this. Have a nice day.
