Subject: RE: photo of the exterior of Garrison Street property

Hi Kate,

Do you mean they want the same odd horizontal divisions? I highly recommend the 6/6, but if they want to match what is there now, I guess they can. We also recommend half screens, but they can use a full screen if it is to be highly transparent.

Let me know if anything else comes up!

Rob

Hi Robert,

The Garrison street job wants to move ahead. They are in the process of filling out the Application for Historic Preservation Review. They have agreed to the 2/2 (horizontal over horizontal) 5/8" grids. The next question we have is regarding the screens. Part 1, can they do a full screen,? Part 2, can the screen be high transparency? Once, I have their final proposal ready, I will forward you a copy so you can see in writing what they want to do

As always, thank you for your patience.

Regards, Kate
