Hi Laurie,

The depth of the footers, will be about 5 feet deep. The concrete pads, will be 6 inches thick and 16 to 18 inches wide. The anchors will be steel rods, drilled into the concrete pads, 4 inches, and will be 8 inches, into the wood post.

Josh,

Can you please clarify the following information regarding the moving the 21' x 30' barn on Westbrook Street.

1. Clarify the depth and size of the footers being installed.
2. Provide foundation anchorage details including size of anchor bolts and depth they extend into the concrete.

Thanks and have a good weekend.

Laurie
