

# DISPLAY THIS CARD ON PRINCIPAL FRONTAGE OF WORK CITY OF PORTLAND

## BUILDING INSPECTION PERMIT

Permit Number: 100161

Please Read  
Application And  
Notes, If Any,  
Attached

This is to certify that 68 JOHNSON ROAD LLC /Portland Fire Department

has permission to building & sheds to be demolished by the Portland Fire Department

AT 68 JOHNSON RD CBL 214A A003001

provided that the person or persons, firm or corporation accepting this permit shall comply with all of the provisions of the Statutes of Maine and of the Ordinances of the City of Portland regulating the construction, maintenance and use of buildings and structures, and of the application on file in this department.

Apply to Public Works for street line and grade if nature of work requires such information.

Notification of inspection must be given and written permission procured before this building or part thereof is lathed or otherwise closed-in. 24 HOUR NOTICE IS REQUIRED.

A certificate of occupancy must be procured by owner before this building or part thereof is occupied.

## BUILDING PERMIT INSPECTION PROCEDURES

Please call 874-8703 or 874-8693 (ONLY )  
or email: [buildinginspections@portlandmaine.gov](mailto:buildinginspections@portlandmaine.gov)

With the issuance of this permit, the owner, builder or their designee is required to provide adequate notice to the City of Portland Inspection Services for the following inspections. Appointments must be requested 48 to 72 hours in advance of the required inspection. The inspection date will need to be confirmed by this office.

- Please read the conditions of approval that is attached to this permit!! Contact this office if you have any questions.
- Permits expire in 6 months, if the project is not started or ceases for 6 months.
- If the inspection requirements are not followed as stated below additional fees may be incurred due to the issuance of a "Stop Work Order" and subsequent release to continue with construction.

  X   Final inspection required at completion of work.

**The project cannot move to the next phase prior to the required inspection and approval to continue, REGARDLESS OF THE NOTICE OR CIRCUMSTANCES.**

**IF THE PERMIT REQUIRES A CERTIFICATE OF OCCUPANCY, IT MUST BE PAID FOR AND ISSUED TO THE OWNER OR DESIGNEE BEFORE THE SPACE MAY BE OCCUPIED.**

<b>Note:</b> Housing Replacement Ordinance in effect			<b>Ok to Issue:</b> <input checked="" type="checkbox"/>
1) Issued with the condition that the owner be aware that the reuse of the property may invoke the existing Housing Replacement Ordinance as per the letter written by Penny St. Louis Littell.			
2) This permit is being approved on the basis of plans submitted. Any deviations shall require a separate approval before starting that work.			

<b>Dept:</b> Building	<b>Status:</b> Approved with Conditions	<b>Reviewer:</b> Jeanine Bourke	<b>Approval Date:</b>
<b>Note:</b>			<b>Ok to Issue:</b> <input type="checkbox"/>
1) The existing septic tank shall be pumped to remove its contents and shall be removed or filled in.			
2) Demolition permits are valid for a period of 30 days from the date of issuance. A written request must be submitted and granted for an extension to this time period. Dust prevention shall be controlled per Chapter 6 of the Municipal Ordinance and demolition per Section 3303 of the IBC 2003.			
3) Demolition permit only. No other construction activities allowed until a separate approved building permit is issued. The foundation hole shall be filled in and the site graded.			

**Comments:**

2/23/2010-mes: This is a single family and our office has been made aware that the owners of the property want to replace the house with a parking lot. I believe that the Housing Replacement Ordinance requires a fee to be paid to the Housing Replacement Fund - permit will be denied until required fee is paid. Or other approval from the Planning Authority is granted - see letter

3/8/2010-mes: Penny wrote a letter stating that this department will issue the demolition with the understanding that the reuse of the property in the future may invoke the existing Housing Replacement Ordinance

3/9/2010-jmb: Spoke to Mark S., he gave me Cptn. Sean Neat's contact 415-1734 for inspection as the PFD will be using this for burn training. He also verified there is no gas service, only oil and tank has been removed. Left a vcmmsg for Sean.

3/17/2010-jmb: Received email from Unitil, ok to proceed

3/16/2010-jmb: Received permit back from Jon R. Left a vcmmsg for Sean N. To confirm sealed drain permit and that this is complete. Also email Rick B. At Unitil to confirm gas service status. Sean N. Called and confirmed the property has a private septic system, not connected to public sewer.

4 Canterbury Lane  
North Reading, Ma 01864

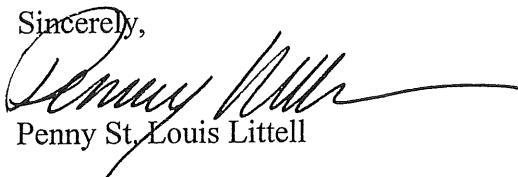

Re: 68 Johnson Road/ CBL 214-A-003

Dear Mr. Sanborn:

Attached you will find an approved demolition permit for the above mentioned property. Your permit indicates your desire to remove existing structures from the property. **Please note that reuse of the property may invoke the existing Housing Replacement Ordinance.** Your permit for demolition does not mention your proposed reuse of the property at this point. In light of other information received by the City, however, I want you to realize the proposed reuse of the property as a *parking lot* would not be permitted unless the requirements of the Housing Replacement Ordinance are satisfied. I know you are working with Steve Bushey, of Sebago Technics, and providing input to the Housing Committee regarding proposed amendments to the Housing Replacement Ordinance which may ultimately would change the applicability of the HRO to your property. However, as there is no guarantee of amendments you are risking the removal of a residential structure and the applicability of the HRO to your property going forward.

Thank you for your thoughtful attention to this correspondence.

Sincerely,

Penny St. Louis Littell

RE: 68 Johnson Road – 214A A003 – B-4 Zone – Permit App. #214A A003

Dear Mr. Sanborn,

I am in receipt of a permit to demolish/remove the buildings located at 68 Johnson Road. The last approved zoning use for the property is the use of a single family dwelling. Section 14-483(c)1 of the Preservation and Replacement of Housing Units Ordinance includes the demolition/removal of even a single family dwelling for the reuse of parking to be regulated. Furthermore any reuse of the original site and/or other properties of the applicant where housing has been demolished, converted or eliminated, shall be reviewed by the Planning Board as a Conditional Use and subject to Site Plan review. It is my understanding that the site will be reused as a parking lot.

I cannot sign-off or issue this permit until such time that I have received the appropriate approvals from the Planning Authority indicating that Inspection Services can proceed with its review of the proposal. Your permit is on hold at this time with no further reviews.

If you have any questions, please do not hesitate to contact me at 874-8695.

Very truly yours,

*Marge Schmuckal*  
Marge Schmuckal  
Zoning Administrator

## *Demolitions and Asbestos*

### 1) Overview

In Maine, building demolitions happen on a regular basis. Many of the demolitions occur in older buildings that are likely to contain some asbestos products, particularly in or on heating (HVAC), wall, floor, and ceiling systems. These demolition projects may be happening without the proper protection of employees, the general public, and the environment. It is important to remember that state and federal laws require that owners have buildings inspected and have any asbestos products properly removed prior to demolition. The Maine DEP is forwarding this information to municipal officials in an effort to increase awareness of and compliance with applicable rules, resulting in less asbestos exposure to the general public, demolition site personnel, and environment.

### 2) What Can Municipalities Do To Help?

Municipalities can greatly assist the people of Maine and the Department by joining with the DEP and the US EPA to ensure that asbestos is properly managed during demolitions. *Specifically, municipalities can hand out appropriate information, issue demolition permits only to persons, who can demonstrate that they will properly handle the asbestos, and mail or fax the building demolition (BDF) report form to the Department.*

The following check-off list can be used.

- A) \_\_\_\_\_ Provided "Asbestos Fact Sheet" to Applicant
- B) \_\_\_\_\_ Had applicant fill out "Building Demolition Form" (BDF)
- C) \_\_\_\_\_ Did not issue Demolition Permit to Applicant not answering "Yes" to three questions on BDF Form (OPTIONAL BUT SUGGESTED)
- D) \_\_\_\_\_ Municipality faxed (or Mailed) BDF Form to DEP at 287-7826

### 3) What Are The Rules?

Simply stated state and federal asbestos rules and regulations require that buildings be inspected for asbestos products and have them removed prior to demolition. The inspection and removal operations must be performed by DEP-licensed companies under regulated and controlled conditions.

### 4) Using The Building Demolition Report Form

The purpose of this form is to ensure that an applicant has the correct information to properly remove asbestos from a building prior to demolition. The form has two parts which need to be filled out by the applicant. The first section of the Form, Per-Demolition Building Inspection.

**Portland (Southern Maine Regional Office): 207-822-6300; 888-769-1036**  
**Maine Department of Environmental Protection**

# ASBESTOS BUILDING DEMOLITION NOTIFICATION

MAINE DEPARTMENT OF ENVIRONMENTAL PROTECTION  
Lead & Asbestos Hazard Prevention Program  
17 State House Station, Augusta, Maine 04333

Maine law requires the filing of the ASBESTOS BUILDING DEMOLITION NOTIFICATION with the Department prior to demolition of any building except a single-family home.

Building owners are required to provide this notification of the demolition of a building to the DEP at least 5 working days prior to the demolition. This notification is not required before the demolition of a single-family residence or related structure (e.g., garage, shed, barn). It is also not required if previous notification of the demolition has been provided to the DEP as part of an asbestos abatement project notification. *Demolition* means the tearing down or intentional burning of a building or part of a building.

Prior to demolition, building owners must determine if there is any asbestos-containing material(s) (ACM) in the building. An "asbestos inspection" by a DEP-licensed Asbestos Consultant is required for all buildings except single-family homes and residential buildings with 2-4 units built after 1980. In lieu of an asbestos inspection, pre-1981 residential buildings with 2-4 units can be surveyed to identify possible ACM by someone knowledgeable about ACM, such as a code enforcement officer or building inspector. If materials that may contain asbestos are found, then you can either assume they are ACM or hire a DEP-licensed Asbestos Consultant to test the materials.

Whenever more than 3 square feet or 3 linear feet of ACM is identified, the ACM must be abated in accordance with the *Maine Asbestos Management Regulations* by a DEP-licensed Asbestos Abatement Contractor. This includes materials presumed to be ACM. Check [www.maine.gov](http://www.maine.gov) for a listing of asbestos contractors.

Prior to issuing a local demolition permit, the DEP requests that municipalities have applicants for municipal demolition permits complete this form and fax it to the DEP at 207-287-7826. Municipalities should not issue local demolition permits if the required asbestos inspection or survey has not been performed and identified ACM removed.

Were regulated asbestos-containing building materials found?  yes  no

## Pre-Abatement Requirements:

A. **Renovation and Demolition Inspections.** Prior to conducting a renovation or demolition activity that impacts any building material likely to contain asbestos (such as those used in roofing, flooring, siding, ceiling, and wall systems) or any component likely to contain asbestos (such as heating, ventilation, air conditioning, and plumbing systems), the owner or operator must have an inspection conducted for the presence of asbestos-containing materials. In lieu of inspection, the owner or operator may presume that building materials and components contain asbestos that requires that these materials be abated in accordance with these rules.

A DEP-certified Asbestos Inspector must perform the inspection. The inspection must identify all asbestos-containing materials that could be impacted during the renovation or demolition activity, must be completed prior to submission of notification to the Department, must be in writing, and must be on-site and made immediately available to the Department upon request.

Residential dwellings constructed before 1981 that consist of two (2) to four (4) units must be evaluated for building materials and components that are likely to contain asbestos. This evaluation may be performed by a DEP-certified Asbestos Inspector or by a person familiar with asbestos-containing building materials. If building materials and/or components likely to contain asbestos are found, these must be removed in accordance with these regulations prior to demolition except as allowed in section 7.B of this rule or must be tested by a DEP-certified Asbestos Inspector to demonstrate that they are not ACM.

Single family residences, and residences constructed after 1980 that consist of two (2) to four (4) units, are exempt from the inspection provisions of this section.

Specific building materials that do not require inspection, sampling, and analysis for asbestos include: wood, fiberglass, glass, plastic, metal, laminates, and gypsum board when joint compound was used only as a filler and not as a layered component, and exterior caulking and glazings. Also, building materials do not need to be inspected when written documents exist confirming that no asbestos was used in the materials that will be impacted, or that the materials were previously inspected by a DEP-certified Asbestos Inspector and affirmatively determined through sampling and analysis to not be ACM.

---

NOTE: To maintain compliance with Maine law, if more than 3 square feet or 3 linear feet of ACM is present, this ACM must be removed prior to the demolition, except that intact packing, gaskets, roofing, and flooring may be left in place when the demolition is performed by large equipment in accordance with these rules. Homeowners are encouraged to conduct a walk through of their single family homes to identify suspect asbestos-containing materials, such as thermal system insulation, ceiling tile, exterior cementitious siding, rigid panels, and resilient floor covering, and hire a consultant or contractor if suspect materials are observed. The Department can provide, upon request, more information regarding common asbestos-containing materials in buildings.

---

### **What is asbestos?**

Asbestos is a general term for several kinds of natural mineral fibers that have been used to strengthen and fireproof materials for nearly 4,000 years. The fibers are recovered from asbestos ore mined primarily in Canada, Russia, and South Africa. In addition to being good insulators, asbestos fibers are strong, flexible, fireproof, and very resistant to chemical attack.

### **What products contain asbestos?**

Asbestos is found in a wide variety of products. It has been used to manufacture nearly 3,500 products such as pipe insulation, boiler covering, sprayed-on acoustical plaster, vinyl floor products, rigid siding, cement pipe, gaskets, paints, paper, textiles, and friction materials like disc brakes. Buildings constructed before 1980 are very likely to contain some asbestos products.

### **Is asbestos a health or environmental problem?**

The presence of asbestos in such a wide variety of consumer products means that most Americans have been exposed, over time, to this mineral to one degree or another.

For the vast majority of Americans who have never worked with asbestos, the exposure received in their lifetime should have no significant health effects. However, for those exposed to large amounts of asbestos for significant periods of time, there may be serious health consequences.

Prolonged high exposure to asbestos fibers has been shown to cause asbestosis (lung scarring), lung cancer, mesothelioma, and several internal cancers such as cancers of the stomach and larynx. People who have been exposed to asbestos who also smoke have a much greater chance of disease than nonsmokers.

### **Is all asbestos potentially dangerous?**

Asbestos products are potentially dangerous if they release asbestos fibers to the air where the fibers can enter the body through the lungs.

Friable asbestos, such as pipe and boiler covering and spray-on insulation, is the asbestos of primary concern. It easily releases asbestos fibers into the air when crushed, handled or disturbed. Asbestos that is in good condition or in a form that does not easily release fibers is much less of a hazard. This means that well-maintained asbestos or asbestos tightly bound into materials like vinyl or cement is much less likely to release asbestos fibers.

### **What are the laws regarding asbestos?**

In Maine, the asbestos regulations apply to any work that impacts greater than 3 square feet or 3 linear feet of asbestos. The Maine "Asbestos Management Regulations" require that the Department be notified prior to removal or repair of asbestos that companies performing inspection, monitoring, design, training, asbestos analysis or abatement be licensed with the Department, and that certain work practices be followed to protect employees and the public. Also, individuals working for the licensed companies must be trained and certified with the Department.

Engineering controls, such as polyethylene "containments", negative pressure ventilation, and wet methods, are basic requirements in the asbestos regulations of both the Maine DEP and the U.S. Occupational Safety and Health Administration (OSHA). Engineering controls minimize the potential for asbestos fiber release in and out of the asbestos work area. The importance of utilizing proper engineering controls on an asbestos project can not be overemphasized.

Maximum allowable employee exposures are regulated by OSHA and personal protective equipment (suits, respirators, etc.) and hygiene standards are prescribed. Protective equipment is to be used only in conjunction with engineering controls and not as a "stand-alone" defense against inhalation of asbestos fibers.

### **Who regulates asbestos?**

Several state and federal agencies regulate asbestos in Maine including:

- Maine Department of Environmental Protection (DEP): Primary asbestos contact in Maine. Responsibilities include regulating licensing, notification, training, storage, transportation, disposal and work practices for removal, inspection, design, monitoring, and analysis of asbestos. Telephone number: 287-2651.

- Federal Environmental Protection Agency (EPA). Regulations include the Asbestos-Containing Materials in Schools Rule (ASHERA - 40 CFR Part 763), the National Emissions Standards for Hazardous Air Pollutants (NESHAP - 40 CFR Part 61), and the Worker Protection Rule (Subpart G to 40 CFR Part 763). The Maine DEP is delegated to implement the ASHERA and NESHAP rules in Maine. EPA telephone numbers are available from the DEP.

- Federal OSHA: responsibilities include regulating employee exposure to asbestos in the workplace through the asbestos construction and industry standards (29 CFR Parts 1926 and 1910). Telephone number: (207) 780-3178.

## **Asbestos Inspections Required Prior to Demolitions and Renovations**

In Maine, improper demolition activities may be the greatest single source of asbestos exposure to the general public and to trades people working on the project. Prior to demolition or renovation of a building, the owner must ensure that the work will not disturb more than 3 square feet or 3 linear feet of asbestos-containing material (ACM). Owners of buildings, other than residential buildings with less than 5 units, must have a DEP-licensed Asbestos Consultant inspect the building (or area) for asbestos. Residential buildings with 2-5 units can be surveyed for likely asbestos-containing materials by knowledgeable non-licensed people (e.g. building inspectors and CEO's who have asbestos-awareness training); any materials likely to contain asbestos must be tested by a DEP-certified inspector or assumed to be ACM.

If ACM is identified in a building that will be demolished, or any building materials are assumed to be ACM, these materials must be removed by a DEP-licensed Asbestos Abatement Contractor before the demolition. Similarly, if any ACM is identified or assumed in areas of a building that will undergo renovation, the ACM must be removed by a DEP-licensed Asbestos Abatement Contractor before the renovation occurs. Intact asbestos-containing flooring and roofing may be left in place during demolition of a building if the demolition is performed by a DEP-licensed Asbestos Abatement Contractor using large equipment in accordance with the Maine "Asbestos Management Regulations".

### **Demolition Notification**

State and federal regulations require that building owners notify the DEP at least 5 working days prior to demolition of a building (other than single-family residences). This notification is required **even if no asbestos is identified in the building**. Forms are available from DEP and your local code enforcement office.

**Please note:** OSHA regulates asbestos anytime an employer/employee relationship exists. OSHA worker protection rules exist and must be followed for abatement activities. Contact the local OSHA office with questions.

### **What if I have additional questions about asbestos?**

The DEP regulates most asbestos activities in Maine and acts as an asbestos information clearinghouse. For more information about asbestos, contact the Asbestos Hazard Prevention Program in the Bureau of Remediation & Waste Management at 207/287-2651 or visit the web site at [www.maine.gov/dep/rwm/asbestos/index.htm](http://www.maine.gov/dep/rwm/asbestos/index.htm)

RE: Weeks Property at 68 Johnson Road, Portland, Maine

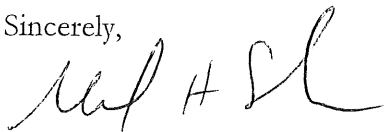

Dear Mr. Morgan:

Transport Leasing recently purchased the Weeks property at 68 Johnson Road which abuts the Brooklawn Memorial Park.

By this letter we are notifying you that we are making arrangements with the City of Portland Fire Department to burn the house and two of the outbuildings on the property. We expect the burn to happen on or about March 1, 2010.

If you have any questions or concerns, please call me at 650-9506.

Sincerely,

Mark H. Sanborn

MHS/pb

RE: Abutter Notification of Demolition at 68 Johnson Road, Portland, Maine

Enclosed is a copy of the letter sent to David Morgan, Brooklawn Memorial Park, 2002 Congress Street, Portland, Maine notifying him of the intention to burn the house and two outbuildings at 68 Johnson Road in Portland. Brooklawn abuts the property on the northern side as well as across Johnson Road.

We, Transport Leasing Corp., abut the subject property on the other two sides.

If you have any questions, please contact me at 650-9506.

Sincerely,

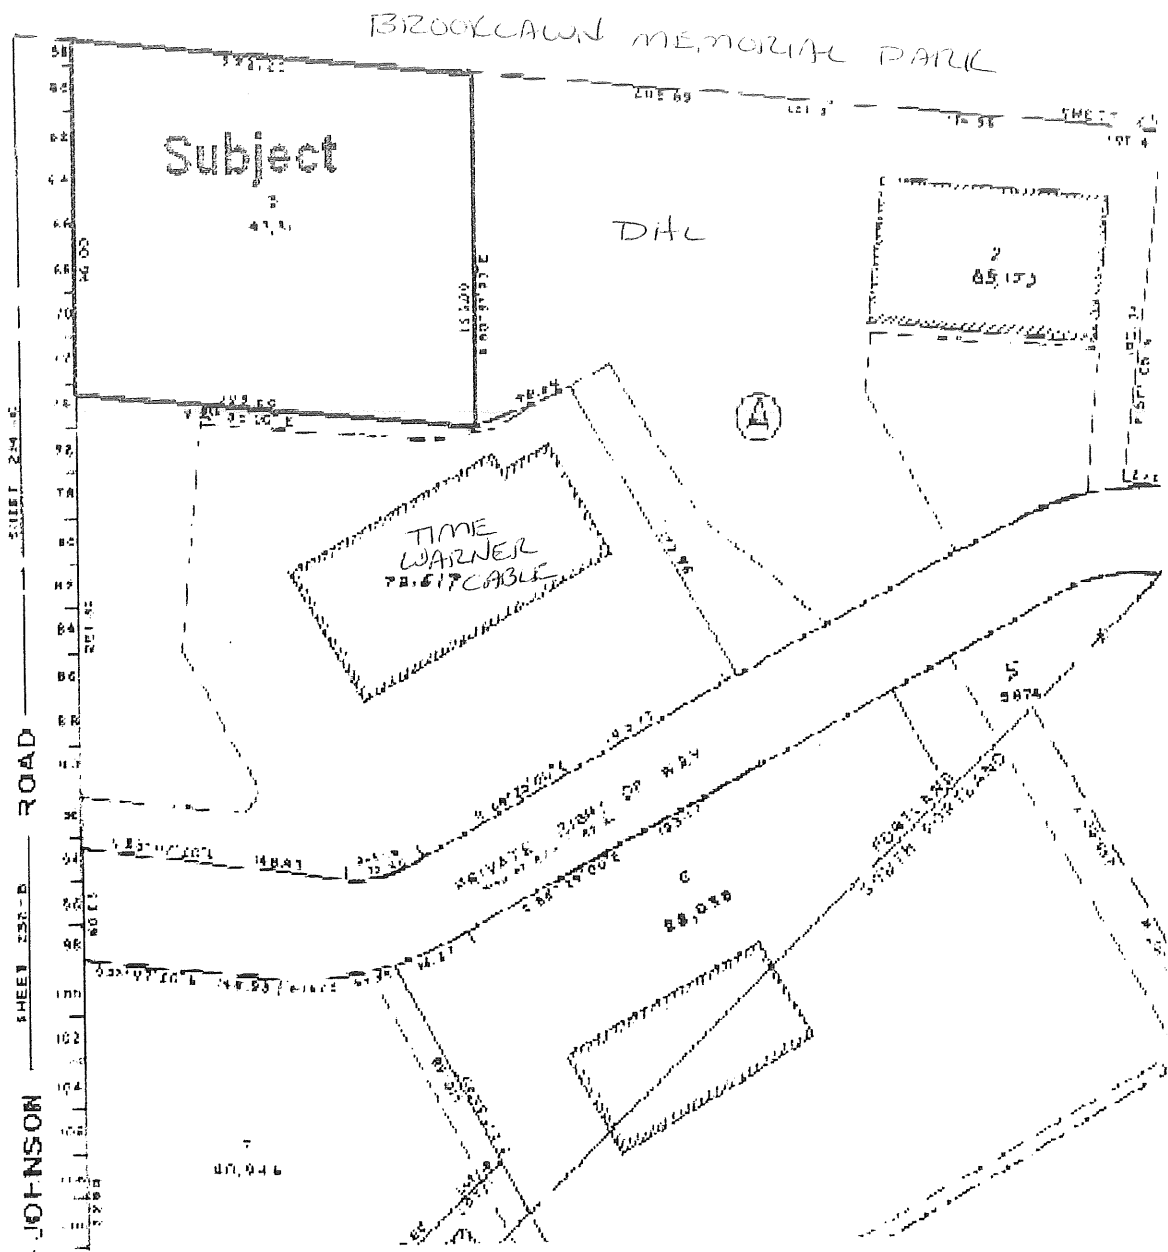

Mark H. Sanborn

# ASBESTOS BUILDING DEMOLITION NOTIFICATION

MAINE DEPARTMENT OF ENVIRONMENTAL PROTECTION  
Lead & Asbestos Hazard Prevention Program  
17 State House Station, Augusta, Maine 04333

**Maine law requires the filing of the ASBESTOS BUILDING DEMOLITION NOTIFICATION with the Department prior to demolition of any building except a single-family home.**

Building owners are required to provide this notification of the demolition of a building to the DEP at least 5 working days prior to the demolition. This notification is **not** required before the demolition of a single-family residence or related structure (e.g., garage, shed, barn). It is also **not** required if previous notification of the demolition has been provided to the DEP as part of an asbestos abatement project notification. **Demolition** means the tearing down or intentional burning of a building or part of a building.

Prior to demolition, building owners must determine if there is any asbestos-containing material(s) (ACM) in the building. An "asbestos inspection" by a DEP-licensed Asbestos Consultant is required for all buildings except single-family homes and residential buildings with 2-4 units built after 1980. In lieu of an asbestos inspection, pre-1981 residential buildings with 2-4 units can be surveyed to identify possible ACM by someone knowledgeable about ACM, such as a code enforcement officer or building inspector. If materials that may contain asbestos are found, then you can either assume they are ACM or hire a DEP-licensed Asbestos Consultant to test the materials.

Whenever more than 3 square feet or 3 linear feet of ACM is identified, the ACM must be abated in accordance with the *Maine Asbestos Management Regulations* by a DEP-licensed Asbestos Abatement Contractor. This includes materials presumed to be ACM. Check [www.maine.gov](http://www.maine.gov) for a listing of asbestos contractors.

Prior to issuing a local demolition permit, the DEP requests that **municipalities** have applicants for municipal demolition permits complete this form and fax it to the DEP at 207-287-6220. Municipalities should not issue local demolition permits if the required asbestos inspection or survey has not been performed and identified ACM removed.

**Were regulated asbestos-containing building materials found?**  **yes**  **no**

2004 Revision #1

**Standard Variance(s) Requested by Maine Certified Asbestos Design Consultant**

Check all that apply. Written Department approval is not required prior to implementation. Standard variances submitted during or before the project due to unforeseeable conditions shall not be implemented until 5 days after the variance is received by the Department unless otherwise approved by the Department.

**1. Wetting ACM (during removal phase only) is not required when:**

- Temperature inside regulated area below 32°F & heating not feasible nor practical
- Electrical conditions exist that would create shock/electrocution hazard
- Operational high-pressure steam lines are being abated/repared

**2. Exhausting to Ambient Air is not feasible when:**

- Distance too great
- Health & Safety concerns (limited egress)

**3. Aggressive Air Clearances in dirt crawl spaces only are not required when:**

- Dirty or dusty conditions exist not related to asbestos activities exist inside or outside the regulated area and will likely result in count overloads (Static Air Samples are required)

**4. Containment and air clearances not necessary when:**

- Enclosure activities do not impact ACM
- X Removal of TSI components that utilize "wrap & cut" methods, provided that an Asbestos Inspector has determined the components to be in good condition & not likely to release fibers during removal, & has recorded this determination in the project design. By signing below, the Design Consultant attests that an Inspector has determined the TSI is in good condition.
- X Removal or repair of ACM using multiple non-contiguous glovebags that are no larger than 60 inches by 60 inches
- X Removal or repair, using contiguous glovebags, that involve a total of no more than 30 l/ft of ACM on a single pipeline, or any amount of ACM that can be removed within 10 glovebags for pipelines running parallel to each other

**5. Remote decontamination unit is needed:**

- Explain:

**6. Smaller than standard decontamination unit needed in residential structure:**

- X A variance to the requirements for minimum decontamination unit size is allowed in residential structures where construction of a decontamination unit meeting minimum size requirements is not possible due to room size and configuration, HVAC system component locations, or restriction of safe egress for residents.

**Note:** A detailed floor plan showing the work area, decontamination unit n and room dimensions must be submitted with the requested variance.

**Design Consultant Sign-off for Standard Variance(s)**
