The Most Energy Efficient

Hot water used for bathing and laundry accounts for nearly 25% of your home's energy bill. An energy efficient water heating system can save you hundreds of dollars each year. The *AirTap Hybrid* next generation of water heaters run on a fraction of the energy used by traditional water heating systems such as electric, gas or tankless so that every bath, shower or laundry costs significantly less.

Our ENERGY STAR[®] certified water heaters use advanced heat pump technology to extract heat from ambient air to provide hot water super-efficiently. Back-up resistance element ensures that households don't run out of hot water even when hot water demand is high. The *AirTap Hybrid* ATI66 model is the only water heater that meets Northern Climate Specification's stringent Tier 2 criteria by providing high levels of energy performance in cooler, northern climates.

UPGRADE Your Electric Water Heater

Save Energy & Money

AirTap Hybrid water heaters use 70%* less energy compared to standard electric water heaters.

Experience a More Comfortable Home

AirTap Hybrid operates at a 48 decibel sound level, similar to a new quiet-run dishwasher.

Rebates & Tax Credits Available

Multiple rebates and tax credits available. For more information contact your local sales representative.

Water Heating System

product features:

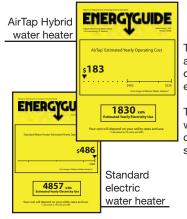

» High efficiency even in cold climate environment

- » Heat Pump rated at 9,000 BTU
- » Supplemental heating from 4kW resistance element
- » Heats water up to 135°F
- » Stainless Steel 304 construction (inside and out)
- » Easy to use control panel with multiple operation modes:
 Econ (Heat pump only)
 - Auto (Heat pump and resistance element)
 - Heater (Resistance element only)
- » Available in 66 and 80 gallon versions

» 6" top exhaust duct (double vent version with air intake ducting option also available)

- » 10-year limited warranty (lifetime warranty on tank)
- » Intelligent controls and error management
- » Emergency back-up heating system

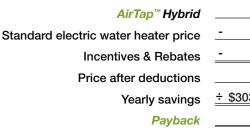

save over \$300 yearly*

The energy guide compares the average annual operation cost of AirTap Hybrid with a standard electric water heater.

The AirTap Hybrid water heater will cost \$183 yearly to operate compared to \$486 yearly for a standard electric water heater.*
