

## VITODENS 222-W VITODENS 200-W

Our Vitodens 222-W and 200-W gas condensing boilers are effective and affordable solutions for small and large heat demands.

### **Vitodens 222-W – compact and convenient**

The Vitodens 222-W gas condensing storage combi boiler is ideally suited to owner-occupied apartments and detached houses. It can be easily installed in a recess in your bathroom or wall mounted in a utility room, where it won't look out of place above the worktop, washing machine or dryer.

The level of DHW convenience provided by the Vitodens 222-W is particularly impressive. This gas condensing boiler has an integral stainless steel loading cylinder with a 46 litre capacity. Where drawing hot water is concerned, this volume is comparable to a separate 150 litre DHW cylinder.

### **Vitodens 200-W – lastingly efficient**

If you are concerned with economy and a long service life, then only stainless steel should be considered. For this reason, the Vitodens 200-W is equipped with a stainless steel Inox-Radial heat exchanger which offers the required reliability and ensures permanently high condensing efficiency.

### **Available as a system or combi boiler**

The Vitodens 200-W wall mounted gas condensing boiler is optionally available as a system boiler with separate DHW heating, or as a combi boiler with an output of up to 35 kW and an integral instantaneous water heater. This ensures that DHW and central heating are available without taking up too much space.

### **Extremely easy to service**

Even in terms of maintenance and service, you'll save plenty of time with these two gas condensing boilers. All components are accessible from the front, making a side clearance for servicing unnecessary.

Last, but not least, all system components, such as the loading cylinder, heating water expansion vessel, pumps and safety valves are fully fitted at the factory.
