Re Storage Shelves AES Job #1682

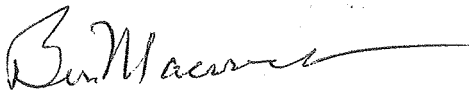

Dear Kevin

As to the above project I have done a visual inspection of the fabrications as to materials, welding and bolted connections and find them all to meet the design requirements as I specified for this project. All fabrications and site welding was performed by the Cianbro Corp which is an AISC certified fabricator and I have attached their AISC Certificate.

I hope this will meet with the requirements of the Portland Building Department as to the structural steel fabrication and installation.

If you need more please fell free to call

Sincerely

Bruce L. Macmaster P.E.
President
