

## DAILY FIELD OBSERVATIONS

**CLIENT:** Old Dominion Freight Lines  
500 Old Dominion Way  
Thomasville, NC. 27360  
Attn: Philip Danner

**PROJECT:** Old Dominion Building Expansion  
185 Rand Road  
Portland, ME

**DATE:** October 2, 2014 **REPORT #:** 14-55-00014-026

---

**General Location:** North Dock Apron, driveway, remaining exterior parking areas  
**Field Rep:** Matthew Pellerin  
**General Contractor:** D.F. Chase  
**Earthwork Contractor:** Shaw Brothers  
**Air Temp:** 68°F  
**Weather:** Sunny

### Summary of Work Performed:

While onsite I observed the addition of a 6" layer of Type A gravel on the North Dock Apron and represents finish grade prior to pavement. The area is 115' x 55' with a uniform thickness. Also observed the addition of a 3" layer of the same Type A gravel across the entire driveway, and remaining exterior parking areas. The same compactive effort was applied to the Type A gravel as recorded for the previous Type D layers.
