Good afternoon

I received a message from Sandy regarding a permit for an 8' high fence for 433 Capisic street with questions regarding the material planned to be used and distance from the street. The material will be grade 1 cedar for all aspects of the fence from posts to panels. As for distance We are set back 10 feet from the edge of the road with the last panel also sloping down from 8' to 6' so the 8' high ends about 20 feet from the edge of the road. Though if that needs to be adjusted for any reason it is easy for us to simply shorten a few panels and we will make sure to be within regulations. If you need written proposal or design simply let me know what you need and where you need it sent and I will be more than happy to send those right out.

Hi Andrew

Thank you for getting back to me.

It would be very helpful for you to send me a written proposal and/or design.

You can email this address. We are ready to approve this permit as soon as you send me this information.

Thank you in advance for your assistance.

Regards,

*Sandy*
