RE: Paving

To Whom It May Concern:

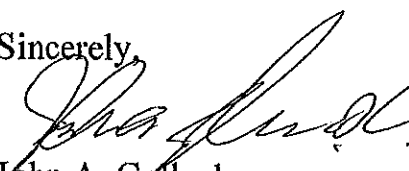

I wish to pave an area measuring 18 feet by 50 feet that is located between my existing driveway and the back boundary of my property. The calculation of this measurement is based on my understanding that I cannot pave within 5 feet of the back and side boundaries.

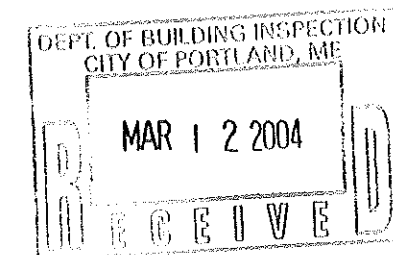

The branches of my neighbor's pine trees overhang my property, if he is unwilling to cut them back, may I have them pruned to the boundary line?

What are the requirements for erecting a fence along the back boundary of my property?

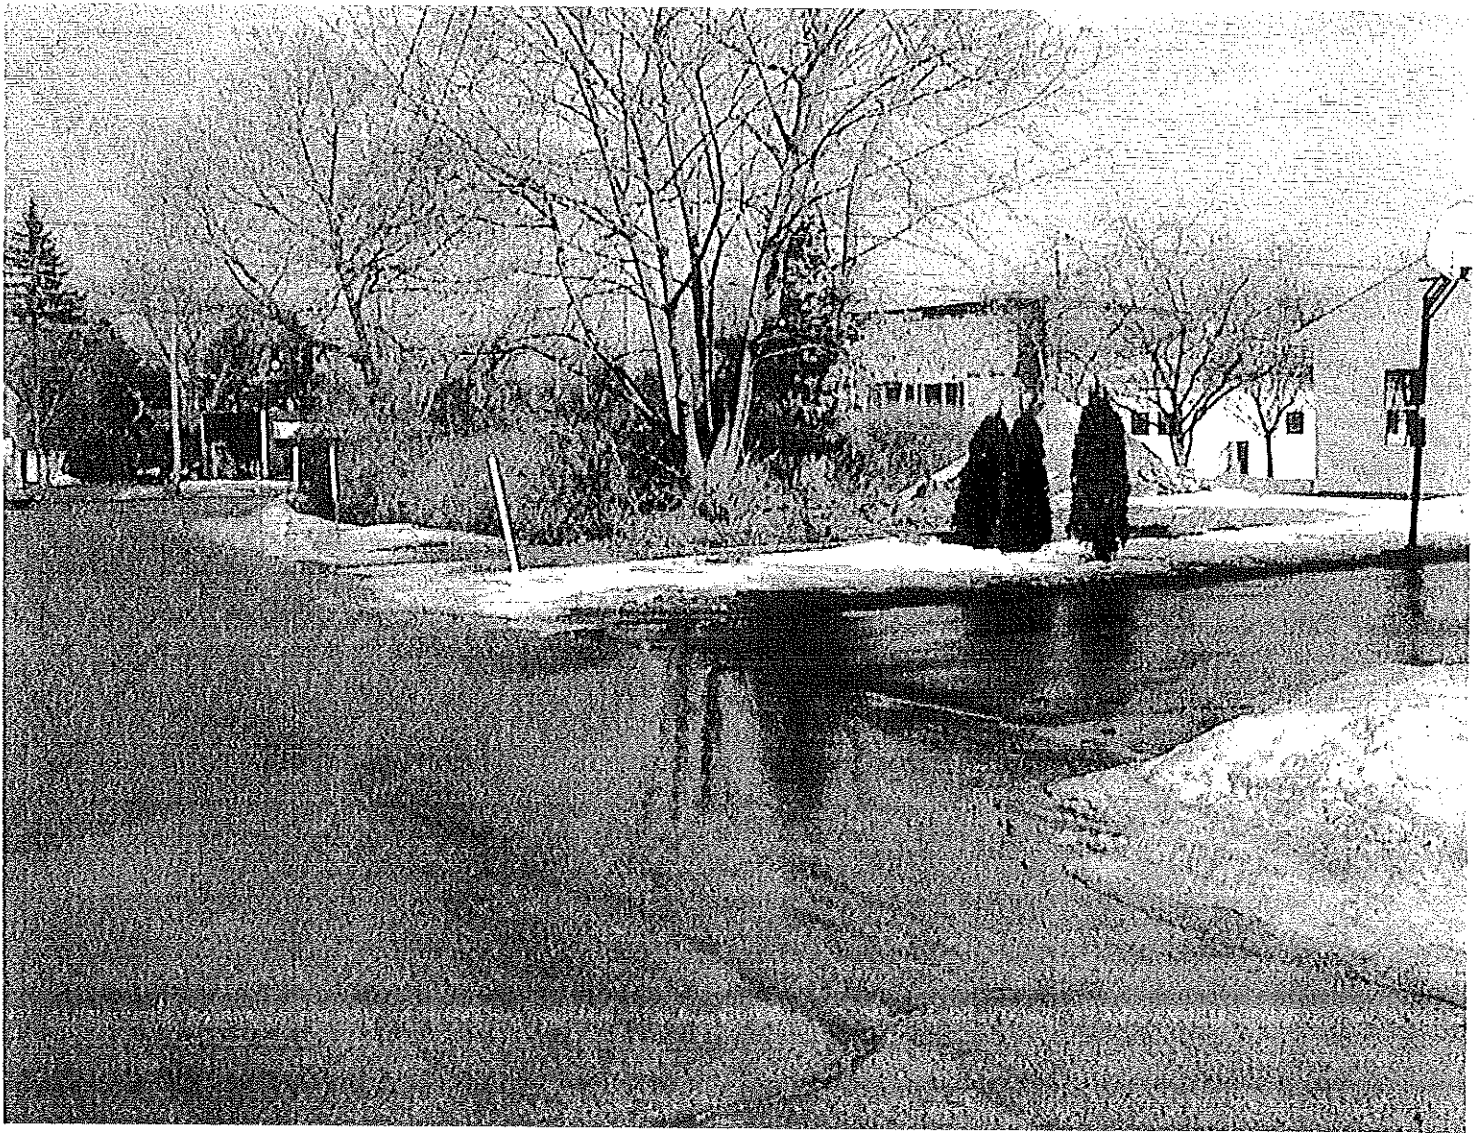

Thank you for your attention in this matter.

Sincerely,

  
John A. Gallagher

RE: Parking area at 520 Capisic Street

Dear Mr. Reynolds:

Please find enclosed a drawing of the requested parking area for 520 Capisic Street. As you can see, the lot would occupy the space between my existing driveway and my back boundary. This parking area would **not** require an additional curb cut. The dimensions listed allow for a side and back boundary setback of at least 5 feet from the respective lines.

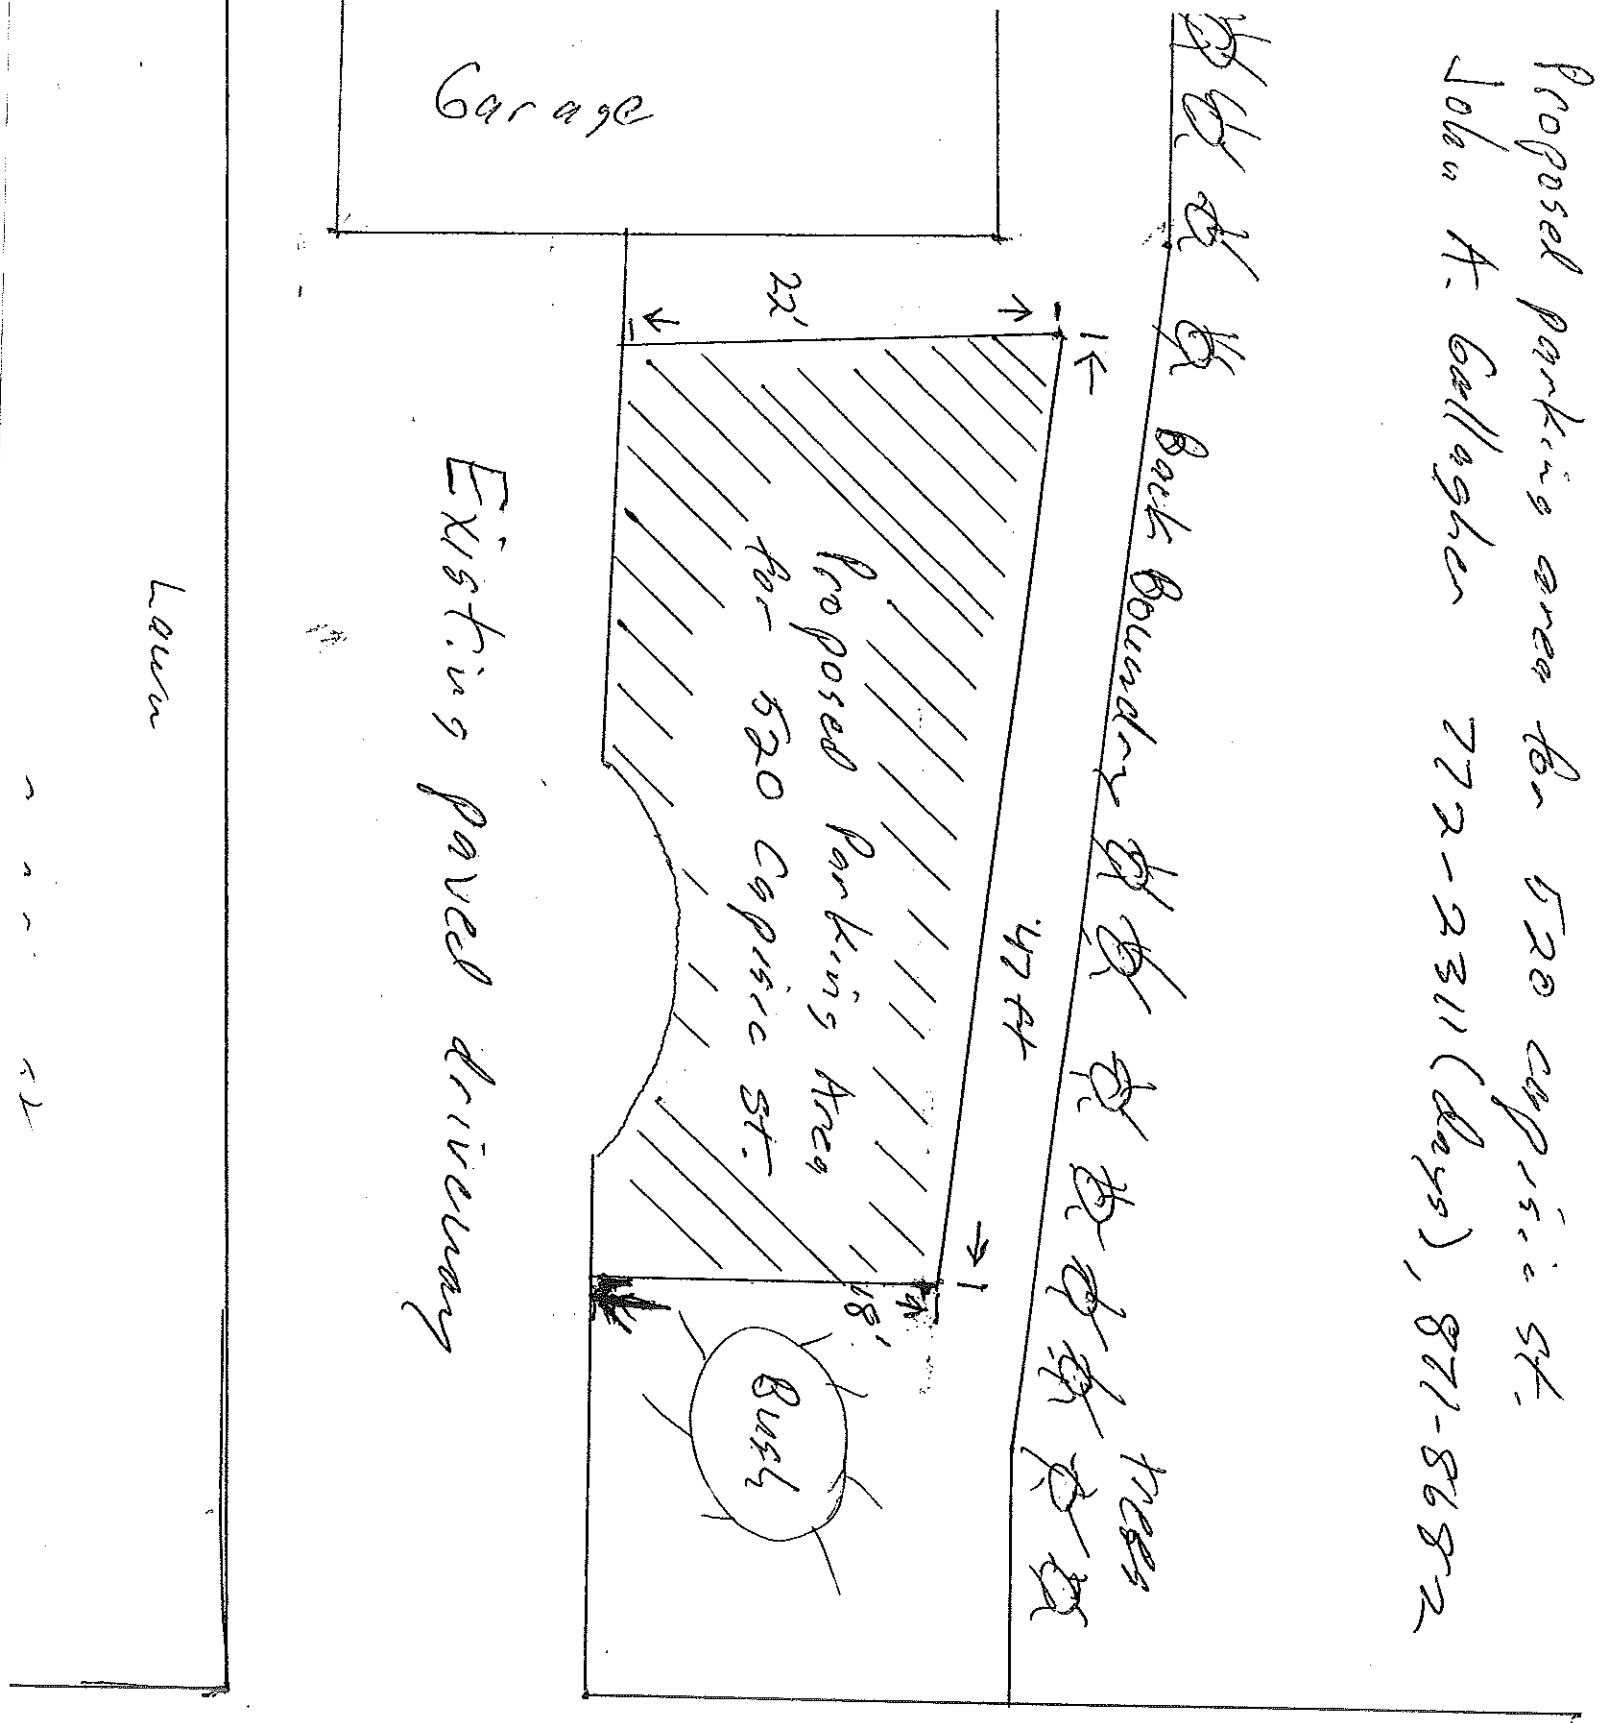

Please contact me at the phone number listed above if you have any further questions.

Sincerely,

John A. Gallagher

Proposed parking area for 520 Caprice St.
