Good Morning Christina,

Attached are a few pictures of the deck. The actual dimensions are 13.5 x 12.

Let me know if you need anything else.

Thank you.

Hi Brennan,

I am in the process of reviewing your application for after-the-fact approval of the deck. Although this is after-the-fact, we do need some information on how the deck was constructed. Could you provide the construction details (spacing of joists, how attached to house), or at least a few good photos showing underside, attachment points, etc.? This can be e-mailed directly to me.

Also, could you provide the dimensions of the deck? Scaling off the plan it appears to be about 13.5' by 20' but if you could confirm the actual figures that would be great.

Once you send this information I should be able to get the permit approved quickly. Let me know if you have any questions.

Yours,
Chris
