Dear Mr. Guilletta:

Permit to construct a sundae on the rear of the dwelling  
at the above address is issued herewith, subject to the  
following building code requirements.

While you have indicated 4x6 sills, you have not shown where  
the 4" sonotube foundations will be placed. Please be  
advised that one is to be placed in each corner plus one in  
the middle of the 12-foot span.

The 4x6 floor joist will not figure out to support the loads  
involved; therefore, it is necessary that you use 2x8 floor  
timbers 16 inches on centers notched over 2x3 nailing strips.

Before sonotubes are poured with concrete, please contact  
this office for a form inspection.

Very truly yours
