RE: Evolution Rock and Fitness HVAC Permit #2015-00342

Dear Ms. Machado,

This letter is to confirm that on 2/27/15, W.H. Demmons, Inc. conducted sound level measurements to quantify the dB(A) levels associated with each of the roof top units at Evolution Rock and Fitness located at 65 Warren Avenue. All of the measurements were performed by a member of our engineering staff utilizing an EXTECH 407736 Sound Level Meter. All measurements were taken at the property line in closest proximity to each of the individual respective roof top units. All roof top units were operational and running at the time the measurements were taken. Below is a summary of the sound level measurements we obtained:

- RTU-1 (25 Ton RTU) = 43 dB(A)
- RTU-2 (5 Ton RTU) = 44 dB(A)
- RTU-3 (3 Ton RTU) = 54 dB(A)

Sincerely,

Mike Richard, P.E.
Vice President / Engineering Manager
WH Demmons, Inc.
