**Proposed Front and Right Side Elevations** 

Pour 8'x 18" Footing to 4'or ledge under house

Summary of Proposed Rehab Construction

- I. Install concrete block foundation under existing house, (a small portion of the foundation may be poured concrete). Currently the house is supported by wood posts. It appears that there is ledge under the house at depths varying from two to five feet.
- **11.** Remove the existing roof. Extend all second floor exterior walls to the height of the dormer walls. Construct a new gable style roof.
- 111. Install a new second floor bathroom directly over the first floor bathroom.
- **IV.** Remove the left side porch and construct a 16-foot by 14-foot 2-story addition in its place. This addition will be supported by a poured concrete foundation. The first floor area of this addition will contain a kitchen and dining area. There will be a new wood deck, (16' by 10'), constructed off the rear of the first floor. The second floor of this addition will become **an** additional bedroom.

Poured Foundation under New Addition
and Existing Rear bumpout

Will provide 3-4 ventilation opening in
crawl space.
