

Final Report of Special Inspections

Project: ME5306 LTE 4C Telecommunication Facility Upgrade

Location: 188 Warren Avenue, Portland, ME 04103

Owner: AT&T Mobility

Engineer of Record: Derek J. Creaser, P.E.
Hudson Design Group, LLC.

To the best of my information, knowledge and belief, the Special Inspections required for this project have been performed and all discovered discrepancies have been reported and resolved.

Comments: Based on my knowledge, information and belief the completed installation substantially conforms to the approved plans, IBC 2009, Structural Standards for Antenna Supporting Structures and Antennas (ANSI/TIA-222-G), the equipment manufacturer's installation guidelines, and the following:

1. Final Construction Drawings "Sprint Portland" dated 03/02/2016, prepared by Hudson Design Group, LLC.

All deviations from the approved plans do not endanger the intended occupancy of the facility and equipment substitutions are approved as equivalent to the original specifications. These inspections did not include tower modification verification. Those inspections are strictly the responsibility of the tower owner and contractor performing such work.

Interim reports submitted prior to this final report form a basis for and are to be considered an integral part of this final report.

Respectfully submitted,
Special Inspector

Derek J. Creaser, P.E.
