Re: Special Inspection Report Summary  
Safelite AutoGlass Addition, 421 Warren Avenue, Portland, Maine  
City Application No. 303-A-010

Dear Ms. Bourke,

I have completed my special inspections of the above project. All listed special inspections were performed in accordance with the original special inspection schedule submitted by Sheridan Corporation dated June 9, 2016. Onsite structural inspection reports along with test results performed by R. W. Gillespie & Associates, Inc. of Saco, Maine for soil materials, compaction, and concrete inspections. Compression breaks of each concrete pour for footings and walls are enclosed as well as the seven day break for the slab concrete. The twenty-eight day results will be forwarded upon receipt from R. W. Gillespie.

I inspected the foundation excavation, backfill, foundation forming, reinforcement, pre-engineered building materials and erection and workmanship. These elements conformed to the plans and specifications. R. W. Gillespie's performed on site inspection, sampling and testing of soils and concrete and found no discrepancies or deviations.

Upon review of the above, I conclude that these elements of the project have met the requirements of the submitted plans and specifications with no discrepancies during the construction process.

Respectfully,

Dana C. Sturtevant, P. E.  
Special Inspector – City of Portland, Maine
