Intelligent Fire Alarm Control Panel

IFP-50

IFP-50 is an intelligent analog/addressable fire control panel (FACP). IFP-50 has a single line circuit (SLC) loop for connecting addressable detectors and modules and has two notification appliance circuits that can be programmed for notification outputs or auxiliary power. IFP-50 also has a built-in dual line digital fire communicator, Form C trouble relay, and two programmable Form C relays. The firmware has powerful features such as detector sensitivity, day/night thresholds, drift compensation and pre-trouble maintenance alert.

IFP-50 supports a variety of other devices that can be added to the system such as RA-100 remote annunciator, 5824 serial/parallel printer interface module (for printing system reports), and 5496 intelligent power module, and SD or IDP devices.

Installation

The IFP-50 is a surface mount FACP.

Compatibility

The IFP-50 SLC supports multiple device types of the *same* protocol:

- SD
- IDP

You cannot mix SD and IDP devices on a FACP. However, any combination of addressable devices of the same protocol can be used on the IFP-50.
