“Effective May 1 2013, U-Value and SHGC information has been added to the MIWD Paradigm Quoting Tool. This information is in beta-test format for the next 60 days and should not be used as a reliable source for specifying thermal performance of the windows. The thermal values printed on the MIWD Order Acknowledgement is what will be printed on the window’s NFRC label. Your help in reporting any discrepancies in the thermal values shown on the MIWD Paradigm Quote vs. MIWD Order Acknowledgement is greatly appreciated.”
