Hi Chris,

Attached please find a new building permit application with my updated specifications and requested supporting information. I have only submitted one plot plan as the footprint of each porch will not change.

I have also submitted a fast track form as well - I think this qualifies as setbacks seem to be less of an issue if I am just doing a simple replacement without increasing the footprint? Although to be honest I'll just be happy to get everything in and in the works and processing at this stage.

I am also removing my request for a zoning appeal.

Please let me know if you have any questions or if my application is not detailed enough.

Thanks,

Tony
