

Fire Department Requirements

Michael MacLearn

76 Winter St. Apt. 1.

Portland, ME. 04102

(207) 956-2860

- The prior use of this location was automotive repair. I propose to convert the existing space into a functioning indoor garden.

- The square footage of the building is as follows:
 - o Total: 4500ft²
 - o First floor proposed changes: 982ft²
 - o Second floor proposed changes: 209ft²

- The existing fire protection of the structure has not changed. The structure has emergency backup lighting and lit exit signs in the case of power failure or fire. In addition there are four fire extinguishers placed strategically.

- Please see attached floor plans (fire dept) for detailed locations of emergency lighting, fire extinguishers, and exit signs.
