Good afternoon,

So based on what you have asked here are the answers.

We will be using 8" metal drip edge flashing.

If the upstairs window does need to come out (as we were not sure yet) the filler would be plywood only. There would be a 2x6 header over it.

As for the windows on the garage, they will be operable. There will also be gutters put around the front of the garage.

thanks and hopefully that answers your questions. Michele Peters
