The original building permit only required that the renovated spaces be upgraded with new fire alarm equipment but the building owner has decided to have us include the one occupied tenant space as a part of our scope of work so that the entire building be upgraded. The price does go up a little bit. Do you need the total for the work? Thanks!

Michelle

Michelle, was this a "phase II" of the fire permit, or a complete change from the original plan? According to the permit, you were stating your cost of work to be \$7700...does that change with this "revision?"

Good morning! Attached are the revised plans for the 659 Warren Avenue Building fire, which we received the permit for and are now adding the remainder of the building. Please let me know if you have any questions.

Thank you,

Michelle
