April, 20th 2016

Fire Prevention Officer:

Please accept this letter as a way of fulfilling the fire departments requirements for a building permit. I have included this letter along with an application for building permit to the department of permitting and inspections.

Allagash Brewing Company is applying for a building permit for 304 square feet of additional office space located in the warehouse facility at 765 Warren Avenue. The addition will include a room for employee lockers and a room to be used as a conference/meeting space.

The proposed fire protection will match and tie into the existing and include fire suppression as shown on the attached Fire Suppression Plan and fire detection as shown on the Electrical Plan. The new structure will match existing for fire ratings of doors and partitions.

There are no new bathrooms or elevators included in this project. We have also included an example of an Emergency Egress plan that is posted throughout the warehouse and clearly identifies exits and egress paths.

If you require any additional information for the permitting of this work please do not hesitate to contact me directly. Thank you.

Sincerely,

A handwritten signature in dark ink, appearing to read "CP", is written over the word "Sincerely,".
