Re: 238 Riverside St.-Portland

Steve:

This letter is to confirm there should **be** an adequate supply of clean and healthful water to serve the needs of the proposed warehouse building at 238 Riverside St. in Portland. Checking District records, I find there is a 12" CI water main on the west side of Riverside St. as well as a water hydrant located in front of the property.

Service records for 238 Riverside indicate there is an 8" fire service and a 1" domestic water service tapped off the 8" fire service. See enclosed service record.

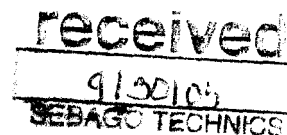

The current data from the nearest hydrant indicates there should be adequate capacity **of** water to serve the needs of your proposed project.

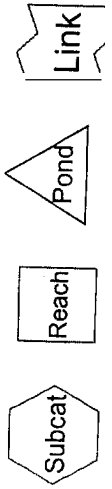

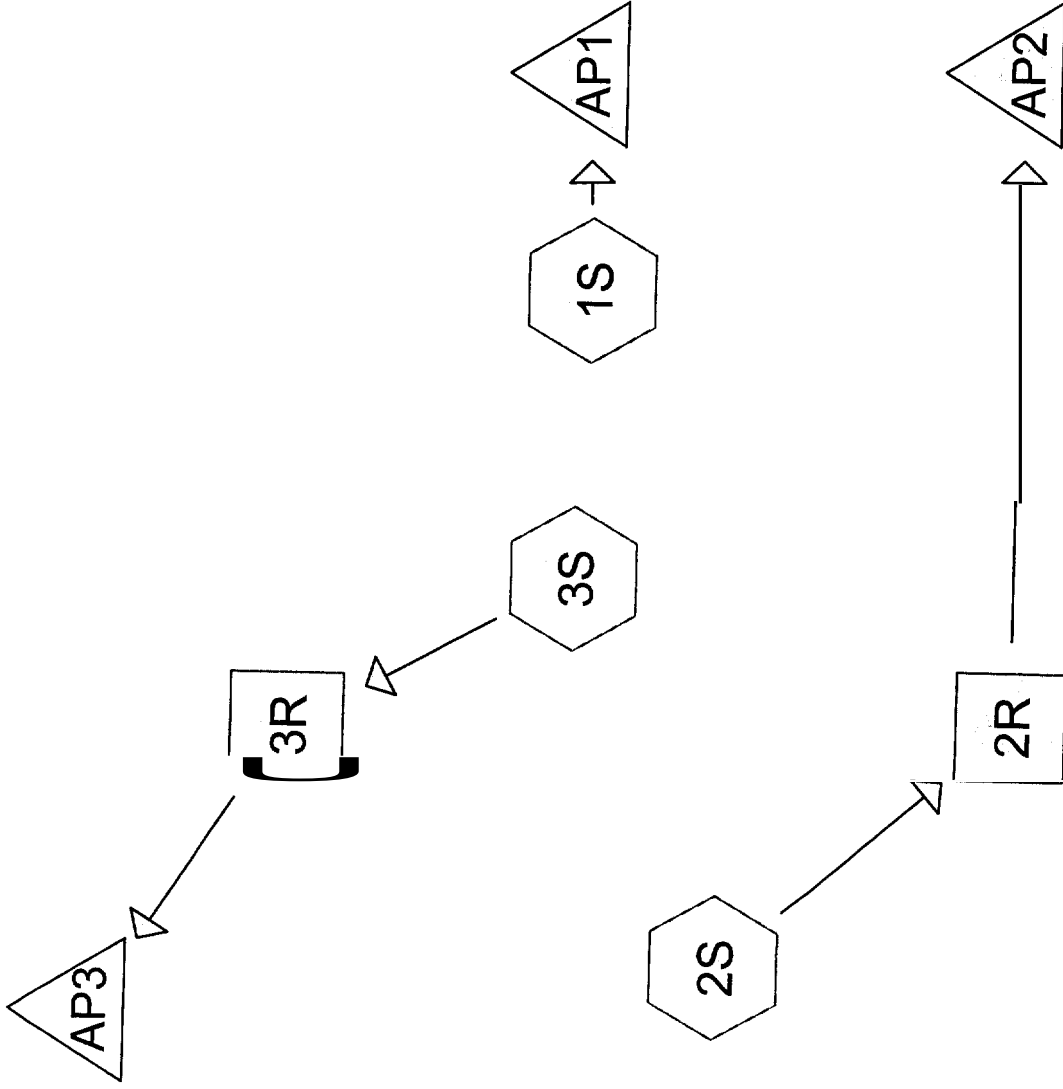

Hydrant Location: Riverside St. 300' north of Campbell St.
Hydrant # 1264
Static pressure = 82 PSI
Residual pressure = 74 PSI
Flow = 1393 GPM
Last Tested = 9/9/2004

If the District can be of further assistance in this matter, please ~~Yt~~ us know.

Sincerely,
Portland Water District

Jim Pandiscio
Means Coordinator
