(name)

SEHolt Architect, LLC
(firm)

Structural Registered Design

Professional in Responsible Charge: Christopher F. Ray, P.E.
(name)

Downeast Structural Consultants
(firm)

To the best of my information, knowledge and belief, the Special Inspections required for this project have been performed and all discovered discrepancies have been reported and resolved.

Interim reports submitted prior to this final report form a basis for and are to be considered an integral part of this final report.

Comments: We have reviewed the Baler Room Steel Framing required to support the cyclone separator at the building located at 380 Riverside Street, Portland, Maine. The construction is performed to current construction industry standards in conformance with The International Building Code, IBC 2009, and the design documents submitted by Downeast Structural Consultants, LLC and dated April 8, 2012 and sketch SK1 6/11/2012.

Respectfully submitted,
Structural Special Inspection Coordinator

Christopher F. Ray, P.E.
