Hi Steve,

I just tried calling you but I was told you are not in today. I wanted to contact you regarding the special events being held at Big Moose Harley Davidson. As you probably know, the approved legal use of this property is retail motorcycle sales and vehicle storage. The city accepts and approves events at local businesses that are incidental and accessory to the legal, permitted uses of the property. However, events must be held only on an occasional basis to be considered incidental. The city's interpretation of "occasional" means that we generally limit the number of events on a property to no more than 20 per calendar year. The city has already approved eight events in 2016 (including the April Live & Local dates), so please take this into consideration when planning for future events.

Also please be sure to obtain a tent permit for any events that require such.

Please let me know if you have any questions about this information.

Yours,
Chris
