

DuctSox is a manufacturer of textile air dispersion products for open and finished ceiling architecture, critical environments, and under floor applications. Our fabric systems are a cost effective, aesthetically attractive alternative to metal ductwork. DuctSox strives to be the leader in the industry through a commitment to quality, service, and innovation.

Our commitment to **INNOVATION** provides unique products for many environments.

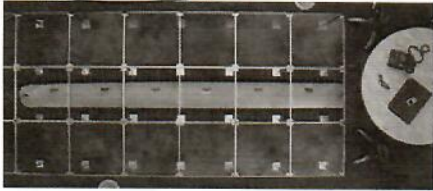

Traditional DuctSox

Custom engineered air dispersion systems for open ceiling applications.

Critical Environments

Unique air dispersion systems offer reduced discharge velocities for critical environments.

Underfloor Air Distribution

Engineered distribution and dispersion systems provide uniform temperature and pressure for raised access floors.

SimpleSox

Simple and adjustable fabric air dispersion systems assembled with pre-made components for open ceiling architecture.
